

Is tjk.org legit? TrustSniffer's high-trust assessment: 90/100

tjk.org

Verdict

tjk.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking Turkish horse-racing portal (TJK) offering race calendars, results, jockey lists and horses for sale. Contains betting-related navigation but the page itself is informational.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is a Turkish horse-racing portal presenting race calendars, results, jockey and horse information, racing statistics, horse-sale listings, institutional material, and betting-related services. Its apparent business model is an organizational and informational portal supporting horse racing, breeding, race administration, and associated wagering activity.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity contradictions were observed. The homepage is thematically consistent with a Turkish horse-racing organization and contains substantial racing, breeding, statistical, and administrative content rather than credential-harvesting prompts. A residual automated brand-similarity signal was not corroborated by the site's subject matter or page behavior. Dynamic activity included external requests and post-interaction page changes, but the observed behavior did not include cloaking, hidden forms, externally submitted password fields, wallet connections, or wallet-draining activity. The available evidence therefore supports an apparently legitimate, low-risk website while leaving the real-world operator identity independently unverified.

EVIDENCE

- Domain registration records show creation on 1997-04-15 and an age of 29.35 years; the registrar is Network Solutions, LLC.
- The homepage contains extensive Turkish Jockey Club–related racing content, including race schedules, results, jockey records, horse information, and administrative services.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections, with no listed threat hit.
- The homepage analysis recorded no login form, no sensitive form, no hidden form, and no password submission to an external destination.

Regulatory Verification Notes

The site provides institutional and legal-navigation material, including organizational information, regulations, and privacy content, which is consistent with a mature public-facing racing portal. However, the supplied pages do not state a license authority or license number, and no independent regulatory connection is established by the available evidence. This is a verification and disclosure gap rather than evidence of a scam. A separate broker-reputation dataset produced no match; that result is contextual only and does not establish licensing or

regulatory status. The operator identity remains unverified, so the site's institutional presentation should not be treated as independent proof of the legal entity behind it.

EVIDENCE

- The homepage navigation exposes institutional sections covering organizational history, leadership, racetracks, breeding facilities, regulations, privacy, and contact services.
- The supplied site content contains no stated license authority and no license number for its betting-related activity.
- Transport telemetry records service through AS60068, CDN77 - Datacamp Limited, GB.
- The site's TLS certificate is OV-validated, issued by GeoTrust TLS RSA CA G1, with validity through 2026-11-14T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, independently confirm the operating entity through an authoritative corporate or racing-sector registry and confirm the authorization applicable to any wagering service. Review the site's regulations, privacy notice, terms, return or transaction conditions, and payment-protection arrangements; contact details should also be confirmed through an independently sourced channel rather than relying solely on the website.

EVIDENCE

- The site exposes “Kanun ve Yönetmelikler” and “KVKK” pages for document-level review.
- The homepage provides a “Bize Ulaşın” contact route suitable for independent channel confirmation.
- The homepage includes “Bahis Yap” navigation, making authorization and payment-protection checks relevant before wagering activity.

Summary Verdict

The overall posture is high trust and low risk, with no observed scam or impersonation contradictions. Available evidence is consistent with an established, apparently legitimate website, but it does not independently verify the real-world operator identity.

Infrastructure Integrity

A CDN/WAF layer is present, with observed edge IPs 15.197.225.128 and 3.33.251.168 on AS16509, alongside infrastructure identified as TJK-AS - TURKIYE JOKEY KULUBU DERNEGI AT YETISTIRICILIGI VE YARISLARI IKTISADI ISLETMESI, TR, on AS41417. This layered posture is a mitigating defensive control that reduces direct exposure of the service, but it is not, by itself, proof of organizational legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credential or payment use should follow ordinary independent counterparty, terms, and payment-protection checks.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tjk.org.

- The request stayed on tjk.org. It was not redirected to another domain. CLEAR
- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by worldnic.com, across 2 name servers. NOTED
- The registration is paid up to 2030-04-16. CLEAR
- It is hosted on CDN77, from a server in CZ. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tjk.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
