Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Tnews.co.th is an established Thai-language news and media website affiliated with Nation Group, presenting advertising-supported coverage of breaking news, politics, society, crime, entertainment, international affairs, lifestyle, and beliefs.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other fraud indicators were observed. The site's long-established domain history and substantial archival continuity align with its current operation as a mature news publisher. External reputation checks were clean, while the homepage contained neither a login form nor a sensitive-data form, supporting a low scam and impersonation risk assessment.

- The domain was registered in 2008 and is approximately 18.1 years old.
- The domain has 5,000 archive snapshots spanning 2008–2022, representing 15 years of tracked history without detected suspicious repurposing or semantic drift.
- The homepage showed no brand-impersonation indicators, hidden forms, sensitive forms, cloaking, suspicious scripts, or cryptocurrency-related functionality.
- External reputation telemetry recorded zero malicious and zero suspicious detections, no malicious safe-browsing finding, and no reported abuse against the assessed delivery address.

Regulatory Verification Notes

The website presents an advertising- and audience-supported publishing model rather than regulated financial, brokerage, payment, or investment services; no financial licence claim is therefore expected from the observed business activity. The homepage supplies editorial and advertising contact information, a privacy policy, and configurable privacy and cookie controls. No conflicting legal-entity names were identified, and no third-party broker profile was matched.

- The homepage identifies the service as a Thai news publisher and describes its editorial coverage through clearly labelled news categories.
- The homepage provides editorial and advertising contact details together with privacy-policy and cookie-preference facilities.
- Domain administration is handled through THNIC.
- The site uses a DV TLS certificate issued by WE1, valid until 2026-10-13.

What to Verify Next

Enterprise onboarding may confirm that the published editorial or advertising channel corresponds to the intended engagement, review the privacy policy against the proposed data-sharing purpose, and document the publisher’s contracting entity where commercial services are contemplated. These are routine counterparty controls rather than responses to identified fraud concerns.

- The homepage’s separate editorial and advertising contact paths provide the appropriate starting points for channel confirmation.
- The published privacy controls provide a basis for reviewing consent and personal-data handling before an advertising or data-sharing arrangement.
- The stated Nation Group affiliation provides a specific organizational relationship that can be recorded during commercial due diligence.

Summary Verdict

The website presents as a legitimate, established, and trustworthy news publisher. Its coherent identity, durable provenance, clean external reputation, substantive editorial content, and sound technical controls converge without contradictory risk signals; normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare’s mainstream CDN and WAF, with all observed addresses belonging to edge infrastructure and no origin-server candidate exposed during the assessment. This reduces direct infrastructure exposure and supports operational resilience, although protective hosting is a mitigating security control rather than independent proof of legitimacy.

- The site is served from AS13335 (Cloudflare, Inc., US).
- Ten observed addresses were Cloudflare edge servers; the confirmed delivery address was 104.16.242.190.
- The infrastructure resolved normally through the ARIN-registered hosting network.

Closing Assessment

Prospective users may engage with the website normally, applying standard organizational controls for any commercial contracting or exchange of personal data.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tnews.co.th.

- The request stayed on tnews.co.th. It was not redirected to another domain. CLEAR
- Registration is published under THNIC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2008-06-30. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tnews.co.th at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
