- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Japanese corporate real-estate platform for 東建コーポレーション, presenting land-utilization consulting, apartment construction, rental-property management, housing search, investor relations, recruitment, sustainability, and related property services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate model covering real-estate development, apartment construction, land-utilization consulting, rental management, brokerage, and tenant services. Company information, history, group companies, investor relations, recruitment, sustainability, governance, and contact pathways are presented consistently, while the assessed pages showed no phishing forms, malicious behavior, or content red flags.

- Homepage: identifies 東建コーポレーション and describes its real-estate and rental-housing services.
- Company-information pages: provide corporate profile, history, group-company information, governance, and compliance content.
- Domain registration: registered 1996-09-04 (~29.93 years old).
- Web archive: 906 snapshots spanning 1998–2026 (29 years tracked).

Regulatory Verification Notes

The site provides substantial corporate and business information, including company details, investor relations, sustainability, risk management, compliance, and contact resources. The supplied content does not establish a third-party regulatory license or license number; this is a limited verification note rather than an indication of misconduct. Any regulatory obligations should therefore be assessed according to the specific property, investment, or advisory service being considered.

- Investor-relations pages: provide corporate, financial, and shareholder information.
- Sustainability pages: describe governance, risk management, compliance, and stakeholder activities.
- Hosting infrastructure: served from AS17506 (UCOM - ARTERIA Networks Corporation, JP).
- Transport encryption: TLS issued by GeoTrust TLS RSA CA G1, OV for TOKEN CORPORATION, valid to 2026-12-11.

What to Verify Next

For a material transaction, confirm the contracting legal entity and applicable regulatory requirements through the company-information and investor-relations pages, then corroborate any required authorization with the relevant official registry. Standard contact and account procedures may be used for ordinary site interaction.

- Company-information pages: identify the corporate and group-information sections relevant to entity confirmation.
- Investor-relations pages: provide the appropriate reference point for material corporate or contractual review.
- Contact pages: provide the site’s stated channels for ordinary business enquiries.

Summary Verdict

The site merits a confident, high-trust legitimacy posture. Its established identity, coherent corporate purpose, sustained public presence, clean assessed reputation, and consistent content support normal business interaction.

Infrastructure Integrity

The site operates on identified Japanese hosting infrastructure with an organization-attributed network path and a valid organization-validated TLS certificate. These are positive technical integrity signals, while infrastructure protection remains a supporting factor rather than independent proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; material property or investment commitments should receive the ordinary contractual and professional review expected for the transaction.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of token.co.jp.

- The request stayed on token.co.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by co.jp, across 3 name servers. NOTED
- The earliest public archive of this site is from 1998-01-19. CLEAR
- It is hosted on UCOM, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about token.co.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
