

# Is tokenpost.kr legit? TrustSniffer's high-trust assessment: 100/100

tokenpost.kr

## Verdict

100

OUT OF 100

HIGH TRUST

tokenpost.kr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 65%.

What this site appears to be

TokenPost is a Korean blockchain and cryptocurrency news homepage offering breaking news, research, market prices, calendars, events, community features, educational material, premium content, store items, quizzes, rewards, and promotional airdrop listings. The page identifies its publisher with business and media registration numbers, named representatives, a Seoul address, telephone numbers, email contacts, and legal policies. It includes standard email, OTP, and third-party social-login options plus a web-push notification prompt.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

TokenPost is an established Korean blockchain and cryptocurrency news portal presenting breaking news, research, market information, educational content, and related media services to visitors; its apparent business model combines editorial publishing with advertising, premium reports or subscriptions, events, and a retail store.

### Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or confirmed malicious reputation signals were observed. Although the homepage covers numerous cryptoassets and supplements its editorial service with airdrop listings, quizzes, points, and rewards, these features are presented within a content-and-community environment rather than as deceptive investment solicitation. Its email, one-time-password, and social-login options are consistent with ordinary account functionality, and no credential form was found to submit to an untrusted destination.

- Domain records show registration through Gabia, Inc. on 16 June 2017, making the domain approximately 9.13 years old; the registration is valid through 16 June 2032.
- The domain has 516 archive snapshots spanning 3 December 2017 to 29 July 2026, covering 10 tracked years with no detected repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no browsing-safety finding, no reported abuse, and no signature match; the domain is also within the Tranco top million at rank 338,984.
- The homepage's authentication form has no untrusted submission destination, while behavioral testing detected no wallet connection, wallet drainer, clipboard hijacking, cloaking, or suspicious inline scripts.

### Regulatory Verification Notes

The homepage provides a comparatively complete publisher identity, including business and media registration numbers, named representatives, a Seoul address, telephone contacts, and legal policies. No financial-services licence is claimed in the supplied content, but the observed activity is that of a news and media publisher rather than a broker or trading venue; consequently, the absence of such a claim is not evidence of illegitimacy. The available broker-intelligence context contains no matched entity and therefore supplies neither an adverse signal nor an independent regulatory determination.

- The homepage identifies the publisher through business and media registration details, named representatives, physical location and telephone channels.
- The homepage provides media-introduction, customer-service, advertising, press-release and legal-policy pathways consistent with an operating publication.
- The site is served from AS13335 (Cloudflare, Inc., US).
- The site’s transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 5 October 2026.

**What to Verify Next**

For institutional onboarding, the published business and media registration details should be matched to the appropriate Korean public records, and the named representatives and address should be reconciled with procurement or counterparty documentation. Any paid subscription, advertising placement, event participation, or store purchase should be governed by the applicable published terms, refund provisions, and invoicing identity. Official support and contact channels should be confirmed through an independent corporate directory when establishing a formal commercial relationship.

- The homepage presents business and media identifiers that provide concrete reference points for registry reconciliation.
- The site offers paid or commercial touchpoints through premium content, advertising, events and store services, making contractual and billing review relevant to enterprise engagement.
- The homepage exposes customer-service, one-to-one inquiry and advertising-contact routes that can support independent channel confirmation.

**Summary Verdict**

The website is legitimate, established and trustworthy. Its durable provenance, coherent publisher identity, substantive editorial operation, clean external reputation and ordinary account controls converge on a high-confidence assessment with no observed contradictory risk signals.

**Infrastructure Integrity**

Cloudflare provides the site’s CDN and WAF layer, with observed edge addresses at 172.67.206.252 and 104.21.69.99. The origin server was not exposed during the analysis, which reduces direct infrastructure exposure but is a protective control rather than independent proof of legitimacy.

**Closing Assessment**

Normal interaction, including account login and standard use, is appropriate; institutional users may proceed with routine counterparty checks proportionate to the intended commercial engagement.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                |            |
|----------------|------------|
| Status         | UNVERIFIED |
| Identity score | 30/100     |

|                                  |     |
|----------------------------------|-----|
| Identity verification confidence | 25% |
|----------------------------------|-----|

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of tokenpost.kr.

- The request stayed on tokenpost.kr. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Gabia, Inc.(http://www.gabia.co.kr). [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2032-06-16. [CLEAR](#)
- The earliest public archive of this site is from 2017-12-03. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about tokenpost.kr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
