

Is tokubai.co.jp legit? TrustSniffer's high-trust assessment: 90/100

tokubai.co.jp

Verdict

90

OUT OF 100

HIGH TRUST

tokubai.co.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Japanese portal (くふう トクバイ) listing supermarket and drugstore flyers, coupons, and local store deals. Site is ad-supported and uses a consent management platform listing numerous advertising/data vendors.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What tokubai.co.jp served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

くふう トクバイ is a Japanese local-deals and coupon portal presenting supermarket and drugstore flyers, store-specific discounts, product offers, and local retailer information; its apparent business model is an advertising-supported service monetized through retailer listings, display advertising, and coupon distribution.

Scam/Impersonation Risk

No phishing, impersonation, conflicting legal-identity, or other contradiction signals were observed. The homepage content is consistent with an informational deals service rather than a deceptive financial or credential-harvesting operation, and the available external reputation checks identified no malicious or suspicious detections. The presence of a login function is an ordinary account feature in this context; no sensitive form, hidden form, wallet interaction, or credential submission to an untrusted destination was detected.

EVIDENCE

- The homepage presents supermarket and drugstore flyers, coupons, product discounts, and store notices, with no fraud indicators identified.
- The homepage contains one login form, while analysis detected no sensitive form, hidden form, external password form, wallet connection, or wallet-drainer activity.
- External security checks recorded zero malicious and zero suspicious detections, with no phishing or impersonation finding.

Regulatory Verification Notes

The available evidence is consistent with an established informational consumer service, not a website presenting itself as a regulated financial provider. No license, registration number, or regulated-service authorization was identified in the reviewed site content; this is a disclosure and verification gap rather than evidence of a scam. The real-world operator identity is not independently verified, so the site's apparent legitimacy should not be treated as proof of the legal entity behind it. The advertising and consent-management model also warrants ordinary privacy-review attention because the site identifies numerous advertising and data vendors. A broker-focused third-party reputation check produced no match, but that result is contextual and is not a licensing determination.

EVIDENCE

- The domain was registered on 2017-02-08 and is 9.53 years old.
- The site has a top-tier global traffic footprint, with a recorded traffic rank of 8472 and inclusion within the top 1 million sites.
- The homepage describes an ad-supported coupon and retailer-listing model and presents consent-management functionality involving advertising and data vendors.
- No license or registration number is stated in the available site disclosures.

What to Verify Next

Before credential or payment interactions, independently confirm the legal merchant identity, applicable return or redemption terms, and available payment-protection arrangements. Account access should be reached through an independently sourced official channel rather than an unsolicited message or advertisement. Retailer-specific offers should be compared with the relevant retailer's own published information, and privacy or consent preferences should be reviewed before accepting optional advertising technologies.

EVIDENCE

- The homepage provides an account-login route, making independent confirmation of the official access channel relevant before credential submission.
- The homepage displays retailer-specific prices, discounts, and promotional offers, supporting comparison with the named retailer before any purchase or redemption.
- The site operates through advertising and coupon distribution, making review of consent choices and privacy disclosures relevant to account use.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website. The overall trust posture is favorable, while the operator's real-world identity remains independently unverified; the assessment therefore supports normal informational use but does not constitute proof of the underlying legal entity.

Infrastructure Integrity

The site is served through Amazon infrastructure and protected by an AWS CDN/WAF configuration; the observed addresses were CDN edge servers, and no origin candidate was identified in this analysis. This provides a meaningful layer of exposure mitigation, but remains an infrastructure safeguard rather than proof of operator legitimacy.

EVIDENCE

- Hosted on AS16509, Amazon-02 — Amazon.com, Inc., US.
- TLS certificate issued by Amazon RSA 2048 M04 at DV validation level, valid to 2027-01-10.
- AWS was identified as the CDN/WAF provider; 2 observed IP addresses were classified as edge servers and 0 as likely origin candidates.

Closing Assessment

Routine browsing is proportionate to the favorable assessment; before submitting credentials or making a payment, ordinary independent checks of merchant identity, transaction terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tokubai.co.jp.

- The request stayed on tokubai.co.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-44.net, across 4 name servers. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tokubai.co.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
