

Is tokyomotion.net legit? TrustSniffer's high-trust assessment: 90/100

tokyomotion.net

Verdict

90

OUT OF 100

HIGH TRUST

tokyomotion.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

TOKYO Motion adult video site showing lists of videos, tags, community and account login/signup. Primary function is media distribution and community interaction; no explicit financial investment or crypto signals detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What tokyomotion.net served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an adult user-generated video and community platform presenting free video listings, tags, categories, member accounts, uploads, and community features. Its apparent business model is content distribution supported by advertising, optional memberships, and user contributions rather than financial investment or cryptocurrency activity.

Scam/Impersonation Risk

No contradictions were observed. External reputation checks identified no malicious or suspicious detections, no phishing or impersonation indicators, and no confirmed blacklist result. The homepage includes login and signup functionality, but the observed forms did not use hidden fields or external password destinations, and no wallet, clipboard, drainer, or malicious-script activity was detected. Automated interaction did produce elevated external network activity, DOM changes, and console errors; however, these signals were attributed to ordinary site behavior and were not accompanied by an abuse pattern or a brand-impersonation finding.

EVIDENCE

- The homepage presents adult video listings, member login and signup, uploads, tags, categories, community, and live-chat navigation without a financial solicitation.
- Behavioral testing recorded 15 external XHR requests and 5 external POST requests across 2 successful runs; it also recorded 14 console errors and a maximum DOM difference of 2,244, while detecting no hidden forms, external password forms, wallet activity, clipboard hijacking, or suspicious inline scripts.
- The domain was registered in 2015 and is approximately 10.97 years old; historical records show 1,483 snapshots spanning 2015–2026, with 12 years tracked and a maximum gap of 1 year.
- Major external reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist result; the site is ranked 1,441 globally and is within the top 1 million domains.

Regulatory Verification Notes

The site appears to operate as an adult content platform rather than a regulated financial service, so financial licensing is not implicated by the observed business model. Nevertheless, the available material does not independently verify the real-world operator, and no license or registration number is claimed on the site. This is a disclosure point for ordinary merchant and service-provider verification, not evidence of fraud. The presence of Terms, Privacy, and DMCA pages provides a basic legal and rights-management structure. Registration through GoDaddy.com, LLC, long-term domain continuity, valid transport encryption, and clean external reputation are collectively consistent with an established website.

EVIDENCE

- The domain registrar is GoDaddy.com, LLC; creation date is 2015-08-31T09:22:13Z and expiration date is 2026-08-31T09:22:13Z.
- The site exposes Terms, Privacy, and DMCA pages through its internal navigation; no license claim, licensing authority, or license number is shown in the supplied site evidence.
- The site's TLS certificate uses DV validation, is issued by GoDaddy TLS Intermediate CA DV - R1v1, and is valid until 2027-01-30T15:37:44+00:00.
- The hosting infrastructure is identified as SOLIDTOOLSINC - SolidTools Technology, Inc., in the United States; the site's transport certificate is valid and issued by a known commercial certificate authority.

What to Verify Next

Before credential or payment interactions, an independent check should associate the service with a clearly identified operator or business, rather than relying solely on on-site branding. Any paid membership terms, cancellation conditions, refund or return provisions, and payment-protection arrangements should be reviewed directly on the relevant pages. Contact channels should be confirmed through an independent route, and the Terms, Privacy, and DMCA provisions should be checked for consistency with the intended use.

EVIDENCE

- The site provides internal links to Terms, Privacy, DMCA, Login, Signup, and account-related functions, enabling direct review of the applicable service conditions.
- Operator identity remains independently unverified in the supplied assessment, while the site's stated activity is a content and community service rather than a financial product.
- The homepage contains account forms and an upload function, making the site's account, moderation, privacy, and content-removal provisions relevant to pre-use review.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the real-world operator is not independently verified.

Infrastructure Integrity

The site is served from infrastructure operated by SOLIDTOOLSINC - SolidTools Technology, Inc., with no CDN detected and one likely origin address identified. This provides a clear hosting attribution but does not independently establish legitimacy; the valid commercial TLS deployment remains a positive transport-security control.

EVIDENCE

- Hosted on AS54288, operated by SOLIDTOOLSINC - SolidTools Technology, Inc., US.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- The TLS certificate is DV-validated, issued by GoDaddy TLS Intermediate CA DV - R1v1, and expires on 2027-01-30T15:37:44+00:00.

Closing Assessment

Ordinary use may proceed with proportionate care, subject to independent confirmation of the operator, service terms, and payment protections before credentials or payment details are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tokyomotion.net.

- The request stayed on tokyomotion.net. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by tokyomotion.net, across 2 name servers. NOTED
- The registration is paid up to 2026-08-31. NOTED
- The earliest public archive of this site is from 2015-09-09. CLEAR
- It is hosted on SOLIDTOOLSINC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tokyomotion.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
