

Is tommasiniimpianti.it a scam? TrustSniffer's high-risk assessment:
0/100

tommaginiimpianti.it

Verdict

0

OUT OF 100

CRITICAL RISK

tommaginiimpianti.it shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate website for Tommasini Srl, an Italian heating systems maintenance company founded in 1985. Describes certifications, legal/regulatory references, seasonal maintenance plans, and provides contact and company registration details.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What tommasiniimpianti.it served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Tommasini Impianti is an Italian corporate website presenting Tommasini S.r.l. as a heating-system maintenance and technical-assistance company, with information on its company history, quality certifications, regulatory references, seasonal maintenance plans, and contracted service model.

Scam/Impersonation Risk

The website's visible content is consistent with a conventional heating-maintenance business and does not display a login form, credential-collection mechanism, financial scheme, cryptocurrency functionality, or other obvious page-level abuse pattern. However, this benign presentation is outweighed by confirmed external security contradictions: reputation screening recorded 12 malicious detections, including detections associated with Fortinet and Sophos, and the domain is confirmed blacklisted by two sources. No conflicting legal-entity names or direct brand-impersonation indicators were identified in the supplied page evidence, but the external detections create a material risk for sensitive interaction.

EVIDENCE

- The homepage and company content describe heating-system maintenance, seasonal service subscriptions, ISO certifications, and references to DPR 74/2013 and DL 81/08; no phishing or financial-scheme indicators were identified in those pages.
- External reputation screening recorded 12 malicious detections and a confirmed blacklist, with Fortinet and Sophos among the flagged vendors.
- The domain was registered on 2003-08-12 and is approximately 23.04 years old.
- Historical records contain 323 snapshots spanning 16 tracked years, from 2011-03-19 to 2026-06-07, with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The company and service descriptions provide a coherent commercial explanation for the website, and the company page presents a history of quality certifications progressing through ISO 9001:2015. The available material does not state a licensing authority or license number; this is a regulatory-disclosure gap rather than independent proof of misconduct. The apparent operator identity remains unverified for purposes of connecting the website to a real-world entity, while the confirmed blacklist and malicious detections remain the decisive concern. A third-party broker-data check produced no match and therefore adds no adverse broker-specific signal, but it is not a licensing determination.

EVIDENCE

- The “Chi siamo” content identifies Tommasini S.r.l. and describes certification claims including UNI EN ISO 9001:2015.
- The company pages reference Italian maintenance and workplace-safety requirements but provide no stated licensing authority or license number.
- The site is hosted on AS31034 (ARUBA-ASN - Aruba S.p.A., IT).
- The site uses a DV TLS certificate issued by Actalis Domain Validation Server CA G3, valid through 2027-03-15.

What to Verify Next

Before any sensitive interaction, an independent offline route should confirm that Tommasini S.r.l. operates the domain and that the published company and registration details correspond to the intended service provider. Any applicable Italian business, technical-certification, or sector authorization should be checked directly with the relevant official registry rather than relying solely on the website. The malicious detections and blacklist status should also be escalated to the organization's security team for independent review before the domain is permitted for login, credential, payment, or other sensitive use.

EVIDENCE

- The company, contact, and location sections are the relevant on-site sources for matching the claimed operator to independently obtained business records.
- The services and certification sections identify the business activities and claimed standards that should be matched against authoritative records.
- The external security findings are sufficiently material to require independent technical validation before sensitive access is approved.

Summary Verdict

The overall posture is **critical trust with elevated sensitive-interaction risk**. Although the website presents a coherent corporate profile and lacks obvious page-level abuse mechanisms, confirmed external security contradictions prevent the site from being treated as trustworthy for sensitive activity.

Infrastructure Integrity

The site resolves directly to Aruba S.p.A. hosting infrastructure in Italy, with two likely origin candidates and no detected CDN or edge-IP layer. The confirmed technical transport evidence is valid DV TLS, but the hosting arrangement itself provides no independent legitimacy assurance and does not offset the external reputation risk.

Closing Assessment

Pending independent resolution of the security findings and operator verification, use should be limited to non-interactive viewing; logins, credential submission, payments, and other sensitive transactions should not be performed through the site.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tommasiniimpianti.it.

- The request stayed on tommasiniimpianti.it. It was not redirected to another domain. CLEAR
- Registration is published under Aruba s.p.a.. CLEAR
- DNS for this domain is served by arubadns.cz. NOTED
- The registration is paid up to 2026-08-12. NOTED
- The earliest public archive of this site is from 2011-03-19. CLEAR
- It is hosted on ARUBA-ASN, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tommasiniimpianti.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent

with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
