Full analysis

Overview

TopInvest is a Brazilian educational e-commerce website offering online financial-market certification courses, subscription plans, simulations, study materials, and career-oriented content for professional learners.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent educational purpose, while behavioral testing found no hidden forms, wallet activity, credential-exfiltration behavior, cloaking, or suspicious script activity. The site's long-running historical presence further supports continuity rather than a recently created deceptive operation.

EVIDENCE

- Registered 2011-11-21; approximately 14.71 years old, with expiry on 2032-11-21.
- 248 archive snapshots spanning 2013-02-11 to 2026-05-20, covering 14 tracked years.
- The homepage contains substantial, coherent educational content and identifies the site as a certification-preparation platform.

Regulatory Verification Notes

The site operates as an education and course provider, presenting preparation for ANBIMA, ANCORD, APIMEC, ABECIP, ANEPS, SUSEP, and Planejar certifications. Its available content includes a CNPJ, registered-trademark references, policies, pricing, and contact information, which supports identifiable commercial operation. The supplied evidence does not establish a financial-services license or regulatory authorization for investment activity; this is a verification point rather than an indication of deception.

EVIDENCE

- The homepage identifies courses, subscriptions, simulations, and free study materials across named professional-certification categories.
- Legal and policy content, pricing, CNPJ information, and company contact details are present.
- Served from AS16509 (Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M04, DV validation, valid to 2026-10-23.

What to Verify Next

For institutional procurement or regulated use, confirm the entity and CNPJ against the applicable Brazilian registry, and confirm that any certification-related claims match the relevant certification body's current

requirements. Independently validate the published commercial terms, refund conditions, and official contact channels before entering a contractual relationship.

EVIDENCE

- The homepage provides the commercial catalog and certification scope.
- The site exposes pricing, policies, and company-identification information for independent review.
- The available evidence describes an educational business model rather than an investment-service offering.

Summary Verdict

TopInvest presents as a legitimate, established, and trustworthy educational platform with a coherent business purpose, sustained historical presence, and clean observed security posture. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by AWS CloudFront CDN/WAF infrastructure, with all observed addresses resolving to Amazon edge servers and no origin candidate exposed. This reduces direct origin exposure and is a positive defensive control, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Standard educational use and account activity are appropriate; regulated organizations should complete their usual entity and certification-scope checks before formal procurement or partnership.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about topinvest.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
