

Is trabzonmegareklamllc.shop safe? TrustSniffer's low-trust assessment: 25/100

trabzonmegareklamllc.shop

Verdict

25

OUT OF 100

LOW TRUST

trabzonmegareklamllc.shop is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Auto-generated index page from a LiteSpeed web server listing directories and files (cgi-bin, php.ini). No forms, marketing, or transactional elements present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://trabzonmegareklamllc.shop/

What trabzonmegareklamllc.shop served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents an auto-generated directory index rather than a functioning commercial, financial, or informational service. Visitors see a LiteSpeed server listing with folders and files such as `cgi-bin`, `php.ini`, and other opaque entries, with no visible business proposition, transaction workflow, or stated operator purpose.

Scam/Impersonation Risk

The site presents a **high-risk sensitive-interaction posture** because external security intelligence records a confirmed blacklist condition and multiple malicious detections, including coverage from Fortinet and Sophos. These signals are materially more significant than the benign presentation of the directory page, which contains no overt marketing or transaction elements but also provides no credible context establishing why the domain exists or who operates it. No separate conflicting legal identities or direct brand-impersonation indicators were observed; however, the confirmed blacklist status is itself a substantive contradiction requiring a security-forward response.

EVIDENCE

- Homepage: displays only an “Index of /” directory listing served by LiteSpeed, with no stated business purpose or operator identity.
- External reputation assessment: recorded a confirmed blacklist condition and multiple malicious detections, with one additional suspicious detection.
- Homepage behavior: no login form, hidden form, wallet connection, external submission, or clipboard activity was observed during testing.

Regulatory Verification Notes

The available site content does not provide a legal entity, regulated-service description, license number, licensing authority, or other meaningful compliance disclosure. This is a significant transparency gap for any prospective financial or commercial engagement, although the captured page does not actually claim to offer a regulated product. The real-world operator identity remains unverified. A third-party broker-reputation lookup produced no matching record, which is only contextual and does not establish licensing or legitimacy.

EVIDENCE

- Homepage: contains no legal, corporate, licensing, or regulatory disclosure.
- Hosting infrastructure: served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Transport encryption: TLS certificate issued by WE1, using domain validation (DV), valid to 2026-11-11.
- Third-party broker-reputation context: no matching record was returned.

What to Verify Next

Before any interaction beyond passive viewing, an independent registry check should establish whether a real operator exists and whether any claimed activity is authorized in the relevant jurisdiction. Any contact or payment route should be confirmed through an independently sourced channel rather than through information discovered on this domain. If the site later presents downloads or account functions, those elements should be assessed separately in a controlled environment before any credentials, payment details, or sensitive data are used.

EVIDENCE

- Homepage: no transaction forms or account-access workflow was available for direct validation.
- Runtime testing: two of two observed runs completed successfully with no external requests or sensitive submission behavior.
- Site identity: the captured content provides no independently verifiable operator or service description.

Summary Verdict

The website should be treated as **low trust with elevated risk for sensitive interaction**. The available evidence does not establish a legitimate operating identity, while the confirmed external security detections create a material basis for caution. Passive observation is materially different from relying on the site for authentication, financial activity, or other sensitive operations.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed addresses are CDN edge infrastructure rather than a directly exposed origin. This reduces direct origin exposure but is only a mitigating architectural control; it does not resolve the site's reputation or identity concerns.

Closing Assessment

Prospective users should limit activity to passive review and refrain from submitting credentials, financial information, or other sensitive data unless the operator and the intended service have been independently validated through authoritative channels.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of trabzonmegareklamllc.shop.

- The request stayed on trabzonmegareklamllc.shop. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about trabzonmegareklamllc.shop at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
