

Is tradebrains.in legit? TrustSniffer's high-trust assessment: 80/100

tradebrains.in

Verdict

80

OUT OF 100

HIGH TRUST

tradebrains.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Trade Brains is an Indian financial and business news portal publishing market news, stock ideas, IPO coverage and sector analysis. The site is ad-supported with many third-party partners and standard consent banners; no signs of credential harvesting or financial scams on the provided page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Trade Brains is an Indian financial and business news portal presenting market news, stock ideas, IPO and corporate-results coverage, sector analysis, banking and credit-card content, cryptocurrency reporting, and real-estate coverage. Its apparent business model is advertising-supported financial media supplemented by sponsored content, press releases, lead generation, and potential affiliate or referral activity for retail-investor audiences.

Scam/Impersonation Risk

No contradictions were observed, including no phishing, impersonation, blacklist, or malicious-reputation finding. The homepage's advertising- and consent-heavy behavior generated some anomalous script, network, and post-interaction page-change observations, but the same review found no hidden forms, password submissions, wallet activity, cloaking, or credential-harvesting mechanism. In context, those observations are more consistent with advertising and third-party integration complexity than with an impersonation pattern. The site's long registration continuity, sustained publishing history, clean external reputation, and established traffic footprint provide converging support for an apparently legitimate website, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Domain registration: 2017-01-07; age 9.59 years; expiration 2031-01-07.
- Web archive: 257 snapshots from 2017-04-07 through 2026-06-27, spanning 10 tracked years, with a maximum recorded gap of 1 year.
- External reputation checks recorded 0 malicious and 0 suspicious detections; the site was ranked 38883 in the observed global traffic dataset.
- The homepage contained no login form, hidden sensitive form, external password form, wallet connection, or wallet-drainer activity.

Regulatory Verification Notes

The available content presents the operation as financial news and analysis rather than as a broker, exchange, or other expressly regulated financial service. No license authority or registration number is claimed in the supplied site content, so the regulatory position of any recommendations, lead-generation activity, sponsored material, or affiliate relationship should be treated as a transparency item requiring confirmation rather than as evidence of misconduct. The operator connection is supported by the site's established publishing footprint, but

it is not independently verified. The registration and transport indicators are consistent with a functioning, established publication.

EVIDENCE

- The domain was registered through GoDaddy.com, LLC.
- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS uses issuer WE1 with DV validation and is valid to 2026-09-24T10:13:33+00:00.
- The homepage identifies the service category as news and financial media and provides sections for Indian markets, IPO analysis, stock ideas, banking, insurance, loans, cryptocurrency, and related business topics.

What to Verify Next

Before any credential or payment interaction, an independent check should confirm the legal entity responsible for the publication, the applicable status of any investment-related recommendations or lead-generation partners, and the identity of any advertiser or sponsored-content provider. Where a commercial transaction is proposed, the relevant return or refund terms and payment-protection options should be confirmed independently of the site. Official support and contact channels should also be cross-checked through an independent route.

EVIDENCE

- The supplied content does not display a licensing authority or registration number for the publication or its financial-content activities.
- The stated business model includes advertising, sponsored content, lead generation, and potential referral activity, making partner and commercial-terms verification relevant.
- The site exposes no sensitive form or credential-collection mechanism on the reviewed homepage, so any later request for credentials or payment should be assessed as a separate interaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradiction. The classification supports ordinary informational use, while the absence of independently verified operator identity means that credential or payment decisions should remain subject to normal business-counterparty checks.

Infrastructure Integrity

Cloudflare CDN and WAF protection sit between visitors and the hosting environment, with all observed addresses identified as Cloudflare edge infrastructure and no origin candidate observed. This reduces direct exposure of the underlying server and is a mitigating infrastructure signal, but it is not proof of the site operator's legitimacy.

Closing Assessment

Routine browsing is proportionate to the available risk posture; before submitting credentials or making payments, the responsible entity, commercial terms, and payment protections should be confirmed through independent sources.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tradebrains.in.

- The request stayed on tradebrains.in. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-01-07. CLEAR
- The earliest public archive of this site is from 2017-04-07. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tradebrains.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
