

Is tradedoubler.com legit? TrustSniffer's high-trust assessment: 90/100

tradedoubler.com

Verdict

90

OUT OF 100

HIGH TRUST

tradedoubler.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 70%.

What this site appears to be

Tradedoubler corporate site describing partner marketing products for brands, publishers and agencies. Contains company information, markets, product descriptions, blog entries and registration/lead capture links. Uses common analytics and advertising tags.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2025.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Tradedoubler is a corporate business-to-business partner-marketing website presenting affiliate programs, SaaS offerings, influencer marketing, publisher services, agency solutions, company information, and registration or lead-capture routes for brands, publishers, and agencies.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity contradictions were observed. The site's substantial corporate content, coherent partner-marketing positioning, and absence of detected red flags support an apparently legitimate presentation. A limited reputational signal exists because 17 abuse reports concern the shared Wix infrastructure address rather than the website specifically; this attribution reduces its relevance to the site's own conduct. The real-world operator identity remains independently unverified, so the available evidence supports legitimacy without proving ownership.

EVIDENCE

- The homepage presents a detailed corporate profile, named service areas, market coverage, careers, company, and contact pathways.
- Domain registration: 1999-10-10; age 26.85 years.
- Web archive: 1 snapshot spanning 2025–2025, covering 1 tracked year; this is incomplete archival coverage and is not treated as evidence that the domain is recent.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing result.

Regulatory Verification Notes

The site presents itself as a commercial partner-marketing and SaaS platform rather than as a financial service. Its company, market, product, publisher, developer, contact, and registration-related pages provide substantive business context, while no financial-services license or registration number is claimed in the supplied content. This is a regulatory-disclosure point for ordinary business verification, not evidence of a scam. The available evidence is consistent with an established, apparently legitimate website, but the operator's real-world identity has not been independently verified.

EVIDENCE

- The homepage title states “Tradedoubler | Boosting partnerships since 1999,” and the site includes Company, About, Careers, Contact, and market-specific pages.
- The site's hosting telemetry records AS58182 operated by Wix.com Ltd., IL.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-10-11.
- The page-authority signal is in the mid range and is used only as contextual support, not as a regulatory determination.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the merchant or contracting entity named in the relevant commercial documentation, review applicable service terms and payment protections, and confirm official support and contact channels through an independently sourced route. Where a regulated activity is contemplated, the relevant jurisdictional register should be checked for the specific legal entity and service involved.

EVIDENCE

- The site provides Company, Contact, Terms-related navigation, registration, and lead-capture routes that can be compared with independently sourced business documentation.
- The homepage exposes separate pathways for brands, publishers, private networks, and platform registration, allowing the intended service relationship to be confirmed before onboarding.
- The supplied page analysis found two forms, limited to registration/sign-up and contact/lead capture, with no sensitive form detected.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate corporate website. No contradictory scam or impersonation signals were observed. The principal residual uncertainty concerns independent confirmation of the real-world operator rather than evidence of malicious site behavior.

Infrastructure Integrity

The site resolves to a Wix.com Ltd. hosting environment on AS58182 in Israel, with one observed IP and no separate CDN edge detected. Wix is a mainstream hosting provider and the identified hosting arrangement is a mitigating infrastructure signal, although hosting infrastructure alone does not establish legitimacy.

Closing Assessment

Normal business browsing is proportionate to the assessment, while independent entity, contractual, and payment-protection checks should precede credential submission or financial commitments.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 17 reports on hosting IP 185.230.63.107 (Wix.com Ltd., Content Delivery Network), 31% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tradedoubler.com.

- The request stayed on tradedoubler.com. It was not redirected to another domain. CLEAR
- Registration is published under OVH, SAS. CLEAR
- DNS for this domain is served by awsdns-41.org, across 4 name servers. NOTED
- The registration is paid up to 2026-10-10. NOTED
- The earliest public archive of this site is from 2025-12-16. CLEAR
- It is hosted on wix_com, from a server in IL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tradedoubler.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
