Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

TradeMap is a Brazilian financial software platform and mobile application that presents investment monitoring, portfolio consolidation, market intelligence, brokerage connectivity, trading functionality, financial news, education, communities, subscription plans, and app access for investors.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent financial-software business model, and the supplied evidence identifies no phishing, impersonation, malicious reputation, or deceptive investment-promise indicators. The site's sustained historical presence and clean external reputation support the conclusion that it is an established operating service rather than a recently assembled imitation.

EVIDENCE

- The homepage describes investment monitoring, portfolio management, market information, brokerage connections, and trading services.
- The domain was registered on 2017-07-10 and is approximately 9.07 years old.
- Historical records show 163 archive snapshots spanning 2018-08-14 to 2026-05-17, covering 9 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site identifies an operating corporate entity and provides corporate contact information, privacy documentation, subscription details, and partner-broker functionality. No financial-services license or registration number is disclosed in the supplied site content; this is a transparency item for regulatory confirmation, not evidence of deception. The available broker-context signal found no matching adverse record.

EVIDENCE

- The site's homepage and associated navigation identify TradeMap as a financial software and investment-information service.
- Corporate ownership is recorded as Valemobi Consultoria Empresarial S/A.
- Hosted on AS13335 (Cloudflare, Inc.); TLS certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, DV validation, valid to 2026-11-20 19:33:12 UTC.
- The site's page content includes privacy information, subscription plans, app access, and identifiable corporate contact details.

What to Verify Next

Before relying on any regulated service feature, confirm the operator's applicable authorization directly with the relevant Brazilian registry and ensure that contractual terms identify the responsible entity. Independent confirmation of official account, application, and support channels is also appropriate before undertaking material financial activity.

EVIDENCE

- The site's legal and privacy materials provide the starting point for confirming the responsible operating entity.
- The homepage presents subscription and financial-service functionality that warrants registry-level confirmation of applicable permissions.
- The site links to established social and application channels that can be cross-checked through independent official sources.

Summary Verdict

TradeMap presents as a legitimate, established, and trustworthy financial-software platform with a coherent business identity, sustained operating history, clean reputation, and no observed impersonation or fraud contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on CDN edge servers and no origin candidates exposed in the analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not by itself proof of legitimacy.

EVIDENCE

- Served from AS13335 (Cloudflare, Inc., US).
- Observed edge IPs: 104.20.36.73, 172.66.163.239, 2606:4700:10::6814:2449, and 2606:4700:10::ac42:a3ef.
- Four unique IP addresses were observed; likely origin IP count was 0.

Closing Assessment

Standard browsing, login, account activity, and ordinary platform use may proceed normally, with registry confirmation reserved for any feature requiring regulated financial authorization.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of trademap.com.br.

- The request stayed on trademap.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-07-10. CLEAR
- The earliest public archive of this site is from 2018-08-14. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about trademap.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
