

Is traderepublic.com legit? TrustSniffer's high-trust assessment: 100/100

traderepublic.com

Verdict

100

OUT OF 100

HIGH TRUST

traderepublic.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 60%.

What this site appears to be

Trade Republic markets regulated digital banking and brokerage services to Finnish residents, including cash interest, card benefits, savings plans, securities, private-market products, and cryptocurrency services. The page provides specific fees, eligibility requirements, BaFin supervision, deposit-protection arrangements, investment-risk warnings, customer-support information, a legal company identity, and a Berlin address.

Evidence status and limitations

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Trade Republic is a digital bank and investment broker serving Finnish residents, presenting an integrated platform for saving, investing, card use, and related financial services through its website and mobile application.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or malicious behavior were observed. The domain has a long operating history, substantial global traffic, and a clean external threat-reputation profile. Its historical record shows no detected repurposing or material semantic shift, supporting continuity rather than opportunistic reuse.

- The domain registration record shows registration in 2005 (~21 years old) through Amazon Registrar, Inc., with expiry in 2030.
- The domain's archive record contains 63 snapshots spanning 2004–2023 (20 years tracked), with no suspicious repurposing detected.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and no reported abuse against the assessed infrastructure.
- The homepage exhibited no hidden forms, credential forwarding, cloaking, wallet-draining behavior, clipboard hijacking, suspicious inline scripts, or brand-impersonation indicators.

Regulatory Verification Notes

The homepage identifies the service as a regulated digital bank and broker, provides a legal company identity and Berlin address, references BaFin supervision and deposit-protection arrangements, and includes investment-risk warnings and customer-support information. Its offerings include 3% interest on eligible cash balances up to €50,000 for new customers, 1% card Saveback into a savings plan, investments starting from €1, recurring plans, securities, derivatives, cryptocurrency and staking, and private-market access through Apollo and EQT. These are conventional but financially consequential services whose market, investment, and eligibility risks are expressly acknowledged on the page. An exact-domain third-party broker record classifies Trade Republic Bank as regulated and reports that a licence was found; this is supportive reputational context, not an independent legal determination. The precise on-page licence or registration number was not established in the supplied page evidence, constituting a minor disclosure-verification point rather than a legitimacy concern.

- The financial-services homepage states BaFin supervision, deposit-protection arrangements, investment-risk disclosures, a legal company identity, and a physical Berlin address.
- The homepage explains that revenue may arise from trading-partner rebates, spreads, third-party costs, single-trade fees, and certain one-time card fees.
- An exact-domain third-party broker record identifies “TRADE REPUBLIC BANK” in Germany as “Regulated,” with “license_found: yes,” based on 1 review; the record is contextual rather than dispositive.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US); its DV TLS certificate was issued by Amazon RSA 2048 M04 and is valid until 2027-01-16.

What to Verify Next

Before opening or materially funding an account, the applicable Trade Republic legal entity and current authorization should be matched against the relevant official regulator’s register. The account terms should also be checked for country eligibility, deposit-protection scope, promotional-interest conditions, execution costs, spreads, third-party charges, and investment-loss exposure. Official support channels should be confirmed through the application or independently established corporate channels when assistance is required.

- The Finnish homepage states that the 3% cash-interest offer applies to new customers and is capped at €50,000, making current eligibility terms relevant.
- The homepage describes Saveback and Round Up as investments that bear risk, rather than guaranteed card rewards.
- The homepage states that every investment bears risk and presents specific pricing and fee information for prospective customers.

Summary Verdict

The website is a legitimate, established, and trustworthy Trade Republic financial-services property. Its long-lived provenance, coherent corporate presentation, clean threat reputation, meaningful traffic footprint, and detailed consumer disclosures converge strongly in support of normal interaction, including account login and standard use.

Infrastructure Integrity

The site uses mainstream Amazon-hosted delivery infrastructure and valid transport encryption. This arrangement reduces direct service exposure and supports connection integrity, although infrastructure protection is appropriately treated as a mitigating security control rather than standalone proof of legitimacy.

Closing Assessment

Prospective customers may interact normally with the site and should apply standard financial due diligence by reviewing the current contractual terms and independently confirming the applicable authorization before committing substantial funds.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of traderepublic.com.

- The request stayed on traderepublic.com. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by awsdns-13.com, across 4 name servers. NOTED
- The registration is paid up to 2030-07-04. CLEAR
- The earliest public archive of this site is from 2004-01-28. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about traderepublic.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with

a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
