- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Traders Brasil is a Portuguese-language informational and news portal covering personal safety, health, applications, technology, consumer issues, and general financial information. It presents free editorial content and appears to operate through advertising, including access prompts linked to viewing advertisements.

Scam/Impersonation Risk

No contradictions, phishing indicators, or brand-impersonation signals were observed. The homepage contains substantive informational content, no login or sensitive-data forms, and no evidence of credential harvesting or financial manipulation. Its advertising-based access model is consistent with a conventional content portal, although opening advertisements in a new window is a minor browsing consideration rather than an identity concern.

- The homepage identifies the site as “Traders Brasil | Mercado de Finanças” and presents articles across safety, technology, consumer, and financial-information topics.
- The domain was registered on 2020-11-20 and is approximately 5.7 years old.
- Web archives contain 110 snapshots spanning 2021–2025, covering five years with continuous historical presence.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or impersonation finding.

Regulatory Verification Notes

The site is presented as an informational publication rather than a regulated financial service. Its privacy and contact pages provide basic site-governance structure, while no licensing claim or registration number was identified; this is a transparency point for any activity extending beyond general information, not evidence of misconduct. No matching third-party broker reputation record was identified.

- The homepage describes the service as informational and states that content is free and does not require personal information or payment.
- The site exposes “Política de Privacidade” and “Contato” pages in its primary navigation.
- The hosting infrastructure is served from AS13335, Cloudflare, Inc.
- The TLS certificate uses issuer WE1, validation level DV, and is valid through 2026-09-23.

What to Verify Next

If a proposed engagement involves regulated financial services rather than reading editorial content, confirm the responsible entity and applicable authorization directly with the relevant official registry. Independently confirm official contact channels before relying on them for consequential matters.

- The homepage describes general financial information but does not present a verified regulated-service authorization.
- The site provides a dedicated contact page for channel confirmation.
- The stated business model is advertising-supported informational publishing.

Summary Verdict

The site merits a high-trust posture and reads as a legitimate, established informational publisher. The available evidence supports normal browsing and ordinary interaction, with no observed contradiction that would undermine its identity or legitimacy.

Infrastructure Integrity

Cloudflare CDN/WAF protection places all observed addresses at CDN edge infrastructure, with no origin candidate identified. This reduces direct origin exposure and is a mitigating security control, but it is treated as infrastructure protection rather than proof of legitimacy.

Closing Assessment

Normal use is appropriate; any activity beyond ordinary content access should remain aligned with the site's stated informational purpose and applicable independent verification requirements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tradersbrasil.com.br.

- The request stayed on tradersbrasil.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-11-20. CLEAR
- The earliest public archive of this site is from 2021-03-02. CLEAR

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tradersbrasil.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
