

Is tradetracker.com legit? TrustSniffer's high-trust assessment: 100/100

tradetracker.com

Verdict

100

OUT OF 100

HIGH TRUST

tradetracker.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 75%.

What this site appears to be

TradeTracker.com presents itself as a global affiliate marketing network operating across 27 countries and four continents, with a regional selector focused on the Netherlands and other markets.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

TradeTracker.com is a global affiliate marketing network connecting advertisers and publishers through performance-based advertising commissions, presenting visitors with an international business network spanning 27 countries, four continents, and 23 offices.

Scam/Impersonation Risk

No contradictions, impersonation indicators, phishing signals, or confirmed malicious findings were observed. The homepage presents a coherent corporate affiliate-marketing purpose, while observed behavior showed no hidden forms, external password submission, cloaking, wallet activity, or suspicious script behavior. Normal interaction is therefore appropriate.

- The homepage contains no login or sensitive-data form and presents a consistent corporate landing-page experience.
- Observed browser behavior recorded no hidden forms, cloaking, wallet activity, or suspicious inline scripts.
- External reputation checks recorded zero malicious and zero suspicious detections.

Regulatory Verification Notes

The available homepage provides limited legal and corporate detail and does not state a license or registration number. This is a transparency item for commercial due diligence, not evidence of fraud or identity conflict. The domain's long continuity, established registration, substantial archival record, valid transport encryption, and reputable registrar materially support the site's established identity.

- Domain registration: 2003-08-01; approximately 23.02 years old; registrar: Amazon Registrar, Inc.
- Web archive: 3,972 snapshots spanning 1999–2026, with 28 years tracked.
- TLS certificate: issuer WE1, DV validation, valid to 2026-10-10T12:10:56+00:00.

What to Verify Next

For formal commercial onboarding, confirm the contracting entity and any applicable market-specific registration requirements through the relevant official registry or documented business channel. Regional users should select the appropriate country page before reviewing local terms and onboarding materials.

- The homepage provides country and regional selectors for market-specific experiences.
- The homepage identifies the service as an affiliate-marketing network but supplies limited detailed business information.

Summary Verdict

TradeTracker.com presents a legitimate, established, and high-trust posture. The evidence converges on a coherent business identity, durable provenance, clean reputation, and benign operating behavior, with no contradiction requiring elevated safeguards.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All observed addresses were CDN edge addresses, with no origin candidate identified; this reduces direct exposure of the origin environment and is a mitigating security factor rather than proof of legitimacy. The hosting layer resolved to AS13335, Cloudflare, Inc., US.

Closing Assessment

Prospective users may proceed with normal interaction, account login, and standard business actions using ordinary organizational onboarding controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tradetracker.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
