Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official-style digital portal of Indonesian commercial broadcaster Trans TV, presenting live television, broadcast schedules, entertainment and news articles, programme archives, videos, account access, careers, and corporate information in support of an advertising- and partnership-funded media business.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, malicious reputation findings, or deceptive browser behaviours were observed. The site's long-established registration and continuous media-focused archival history strongly support provenance: historical and current content consistently relate to Trans TV and television broadcasting, with no evidence of domain repurposing. The homepage also showed no hidden or sensitive forms, credential forwarding, wallet interaction, clipboard manipulation, cloaking, or suspicious inline scripts.

- Domain registration records show registration through PT Digital Registra Indonesia on 26 September 2000, making the domain approximately 25.87 years old; registration currently expires on 1 September 2028.
- The web archive contains 2,342 snapshots from 1 April 2002 to 6 June 2026, spanning 25 tracked years, with no fundamental change from the television/media category.
- External reputation checks recorded zero malicious and zero suspicious detections, no search-safety warning, no abuse reports, and no matching threat signatures.
- The homepage presented consistent Trans TV branding, broadcaster-specific programming, and no detected impersonation, phishing, or content-level red flags.

Regulatory Verification Notes

The homepage identifies the operating entity as PT Televisi Transformasi Indonesia and provides corporate, career, contact, and cyber-guideline navigation together with a Jakarta business address. The reviewed material does not establish a specific broadcasting licence, licence number, or issuing authority; this is a limited disclosure-verification point rather than evidence of illegitimacy. No adverse broker-profile match was found, although such contextual data is neither a licensing determination nor a substitute for an official registry.

- The homepage attributes the broadcaster operation to PT Televisi Transformasi Indonesia and displays corporate and contact pathways.
- The homepage provides a physical business address in Jakarta alongside dedicated corporate and career navigation.

- The reviewed homepage contains no stated licence number or named licensing authority.
- The available third-party broker-intelligence context produced no matching profile for the site.

What to Verify Next

For institutional onboarding or a regulated commercial relationship, the legal entity should be matched against the applicable Indonesian corporate and broadcasting records, and any claimed authority should be confirmed directly with the issuing body. Commercial counterparties should also obtain contracting, invoicing, and bank-account instructions through independently confirmed corporate channels. Routine visitors may use the site normally, while independently confirming official contact channels remains appropriate for consequential business correspondence.

- The homepage exposes dedicated “Corporate,” “Contact Us,” and “Career” routes that can be compared with independently sourced organizational records.
- A “pedoman siber” navigation item provides a site-level reference point for reviewing applicable editorial or digital-media governance information.
- A “kerjasama multiplexing” route indicates a defined commercial-cooperation channel whose counterparties can validate mandate and contracting authority.
- The homepage offers sign-in and sign-up links but displayed no embedded sensitive form or untrusted form destination during the reviewed capture.

Summary Verdict

The site is a legitimate, established, and trustworthy broadcaster portal. Its coherent corporate identity, durable historical continuity, clean external reputation, substantial audience footprint, and benign observed behaviour converge strongly in support of normal use, including account login and standard interaction.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF, and all four observed addresses were Cloudflare edge nodes rather than exposed origin infrastructure. This mainstream protective architecture reduces direct origin exposure and supports availability and filtering, while serving only as a technical mitigation—not independent proof of organizational legitimacy. Transport encryption was valid and appropriately configured.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US), with four observed CDN edge addresses.
- The site’s TLS certificate was issued by WE1 with domain validation (DV) and is valid until 18 October 2026.
- DNS and hosting observations identified Cloudflare as a trusted CDN/WAF, with no likely origin-server address among the observed endpoints.

Closing Assessment

Normal browsing, streaming, account login, and standard site use are appropriate; institutional counterparties should apply ordinary vendor-onboarding controls before entering a material commercial arrangement.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of transtv.co.id.

- The request stayed on transtv.co.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-09-01. CLEAR
- The earliest public archive of this site is from 2002-04-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about transtv.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
