- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

TransUnion South Africa is a corporate credit-information and consumer financial-services website offering credit reports, credit scores, monitoring, identity-theft protection, business credit reports, consumer education, support resources, and member access.

Scam/Impersonation Risk

No contradictions were observed across the site identity, content, reputation, and behavioral signals. The homepage presents a coherent corporate service model with identifiable products, support resources, policies, and corporate information; it contains no phishing, impersonation, deceptive investment, or other fraud indicators. The domain's long operating history and sustained archival presence further support continuity rather than opportunistic repurposing.

- Domain registered in 2002 and approximately 24.17 years old.
- Web archive contains 272 snapshots spanning 2006–2026, with 21 years tracked.
- The homepage identifies TransUnion South Africa and presents credit-information and identity-protection services.
- External reputation checks recorded no malicious or suspicious detections, blacklist hits, or abuse reports.

Regulatory Verification Notes

The legal, privacy, cookie, support, and corporate-content structure is consistent with an established financial-information provider. No license number or licensing authority is identified in the supplied page evidence, so the applicable regulatory or consumer-protection status remains a verification item rather than an adverse legitimacy finding. Domain registration is recorded through CSC Corporate Domains Inc.

- Hosted on AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS certificate issued by Entrust OV TLS Issuing RSA CA 2, with OV validation, subject organization Trans Union LLC, valid through 2027-02-04.
- The homepage navigation includes About, Consumer Support, privacy/cookie material, and credit-report assistance resources.
- The supplied third-party broker dataset contains no matching record.

What to Verify Next

For any regulated or contractual engagement, confirm the applicable South African licensing, registration, and consumer-disclosure requirements through the relevant official registry and independently validate the organization's published support and corporate channels.

- The homepage provides product, support, education, and credit-report assistance pathways.

- The site includes member-login and subscription pathways.
- The supplied page evidence identifies no license number or licensing authority.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate service with no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating at CDN edge infrastructure and no origin candidate identified. This provides a meaningful mitigation against direct origin exposure, while remaining a protective control rather than proof of legitimacy.

Closing Assessment

Standard account use and service engagement are proportionate to the assessed posture; higher-value institutional arrangements should follow normal procurement and regulatory due diligence.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about transunion.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
