

Is tribunnews.com legit? TrustSniffer's high-trust assessment: 100/100

tribunnews.com

Verdict

100

OUT OF 100

HIGH TRUST

tribunnews.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

TribunNews homepage — large Indonesian news portal with editorial content across national, international, regional and topical sections; consent/cookie banner present and heavy ad/vendor ecosystem referenced.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

TribunNews.com is an established Indonesian digital news publisher presenting current national, international, regional, sports, business, health, technology, travel, and entertainment coverage, supported primarily by advertising, vendor partnerships, and premium or electronic-paper services, with account and consent functions available to visitors.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no indicators of phishing, brand impersonation, malicious activity, or adverse external reputation. The homepage contains a login form and a consent form, while behavioral testing recorded hidden forms and substantial page changes after interaction; however, no external password form, wallet activity, clipboard manipulation, cloaking, or credential-harvesting behavior was observed. In context, the interaction pattern is consistent with a complex advertising, personalization, and consent environment rather than an identified impersonation scheme.

EVIDENCE

- The homepage presents editorial navigation across national, international, regional, sports, business, health, technology, travel, and entertainment sections, with no content red flags identified.
- The site's domain was registered in 2010 and has an age of 16.59 years; registration is through Amazon Registrar, Inc.
- Historical records show 5,000 snapshots from 2010-03-04 through 2016-01-17, spanning 7 tracked years, with no suspicious repurposing or semantic drift identified.

Regulatory Verification Notes

The site presents itself as a media publisher and exposes links to its media guidelines, privacy policy, editorial information, and contact page. The supplied evidence does not independently verify the real-world operator, and no licensing or registration number relevant to a regulated financial service was identified; this is a verification and disclosure matter rather than evidence of a scam. The absence of a broker-dataset match and the clean external reputation provide contextual support, but neither constitutes a legal or licensing determination.

EVIDENCE

- The homepage links to “Pedoman Media Siber,” “Privacy Policy,” “Redaksi,” and “Hubungi Kami.”
- The homepage describes a news and video service with local Indonesian perspectives rather than a financial or brokerage offering.
- External reputation checks returned no malicious or suspicious detections, and no blacklist or phishing indicator was recorded.

What to Verify Next

Before credential or payment interactions, an independent source should be used to confirm the publisher’s legal operator and the official account and support channels. For any paid or premium service, the applicable merchant identity, refund or return terms, and payment-protection arrangements should be checked independently. Any applicable media registration or consumer-protection status should likewise be confirmed through the relevant official registry where required.

EVIDENCE

- The homepage provides an account-login path, making independent confirmation of the official account destination appropriate before credential submission.
- The site offers premium or electronic-paper services, making merchant-identity and payment-protection checks relevant to paid interactions.
- Operator identity remains independently unverified in the available evidence.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was observed, although the available evidence does not prove the real-world identity of the operator.

Infrastructure Integrity

The site is protected by Amazon CloudFront CDN/WAF infrastructure, with all observed addresses functioning as edge servers and no origin candidate identified. This reduces direct origin exposure and is a mitigating infrastructure signal, but it is not proof of operator legitimacy.

EVIDENCE

- Hosted on AS16509, Amazon.com, Inc., US; the observed infrastructure includes four Amazon CloudFront edge IP addresses.
- TLS is issued by Amazon RSA 2048 M01 at DV validation level and is valid to 2026-09-27.

Closing Assessment

Normal browsing and ordinary site use are proportionate to the assessed posture; independent identity, consumer-protection, and payment checks should precede any credential submission or paid interaction.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tribunews.com.

- The request stayed on tribunews.com. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by awsdns-29.org, across 4 name servers. NOTED
- The registration is paid up to 2027-01-13. NOTED
- The earliest public archive of this site is from 2010-03-04. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tribunnews.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
