Full analysis

Overview

TripADeal is a travel e-commerce marketplace presenting discounted tours, cruises, hotel packages, flights, holiday experiences, flexible payment options, customer support, and Qantas Points rewards for consumers booking travel.

Scam/Impersonation Risk

No contradictions were observed. The site's travel-commerce presentation is internally coherent, with no detected phishing, impersonation, malicious-content, or deceptive-financial indicators. External reputation checks were clean, and the domain has a substantial, continuous public history consistent with an established business.

- The homepage is classified as a travel e-commerce site and presents tours, cruises, hotels, flights, and booking services.
- The homepage contains no login form, hidden form, wallet-connect behavior, or sensitive external form submission.
- External reputation checks recorded zero malicious or suspicious detections and no blacklist match.
- The domain has an authoritative age of 15.143052703627653 years; archival records begin on 2011-06-10.

Regulatory Verification Notes

The business model is conventional travel retail, involving package sales, deposits, instalments, and loyalty-point transactions rather than investment or financial products. No license claim, licensing authority, or license number is identified in the supplied site evidence; this is a transparency item for applicable travel-sector requirements, not an identity contradiction. The recorded registrant is TRIP A DEAL PTY LTD, using Domain Directors Pty Ltd trading as Instra as registrar.

- Archival coverage contains 1,661 snapshots spanning 2011-06-10 through 2026-07-05, across 16 tracked years.
- The homepage provides a detailed commercial description of travel packages and booking services.
- WHOIS records identify TRIP A DEAL PTY LTD as owner and Domain Directors Pty Ltd trading as Instra as registrar.

What to Verify Next

Confirm the business's applicable travel-seller, consumer-protection, cancellation, and payment disclosures through the relevant jurisdictional registry or regulator. Before material bookings, independently confirm customer-support and payment-channel details using official contact information obtained outside the transaction flow.

- The homepage presents booking services involving deposits, instalments, and package purchases.
- Customer-support and flexible-payment claims are displayed as part of the booking proposition.

Summary Verdict

The site presents as a legitimate, established, and trustworthy travel marketplace. No scam, phishing, impersonation, or other contradicting risk signal was observed, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All observed addresses are CDN edge servers on AS13335; the origin server was not observable, which reduces direct origin exposure but is only a mitigating security characteristic, not proof of legitimacy.

- Hosted through AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- TLS certificate issuer: YE2; validation level DV; valid through 2026-10-09T02:08:59+00:00.

Closing Assessment

Prospective users may proceed with ordinary account, booking, and payment activity while applying standard transaction and record-keeping practices.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tripadeal.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
