Full analysis

Overview

The website is an established Brazilian classified marketplace presenting priced listings for trucks, trailers, utility vehicles, and heavy agricultural and construction machinery, while connecting prospective buyers with advertisers and offering related financing and lead-generation pathways.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other scam-related conflicts were observed. The marketplace content is coherent with its stated commercial purpose, and its long historical footprint shows no established suspicious repurposing. External threat-intelligence checks were clean, while controlled interaction produced no cloaking, hidden forms, suspicious scripts, clipboard manipulation, or unauthorized external submissions.

- The homepage consistently identifies the service as Trucadão and presents search filters, priced inventory, seller-advertising functions, and marketplace-safety claims.
- The domain's registration record dates from 2011 and indicates an age of approximately 14.7 years.
- Web archives contain 1,159 snapshots spanning 2009–2026, representing 18 years of tracked history without a demonstrated change to an unrelated business category.
- Technical reputation checks recorded zero malicious and zero suspicious detections, no malicious safe-browsing finding, and no reported abuse against the assessed delivery address.

Regulatory Verification Notes

The homepage identifies the operating entity as Trucadão Ltda. and publishes CNPJ 15.070.149/0001-14, providing a concrete corporate identifier consistent with a Brazilian commercial marketplace. The supplied pages do not establish a licensing claim or name a financial regulator; because financing is promoted as part of the customer journey, the capacity in which Trucadão participates—such as advertiser, lead generator, intermediary, or credit provider—is not clear from the available content. This is a limited disclosure question rather than evidence of deception, and no adverse broker-database match was identified.

- The homepage footer identifies “Trucadão Ltda.” and displays CNPJ 15.070.149/0001-14.
- The homepage navigation includes a dedicated financing pathway but provides no observed license number or named supervisory authority.
- The hosting infrastructure is served from AS13335, operated by Cloudflare, Inc.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-09-16.

What to Verify Next

For material purchases, the listing, seller identity, asset ownership, condition, and payment instructions should be independently confirmed before funds are transferred. Where financing is pursued, the contracting lender, applicable terms, and Trucadão's intermediary role should be checked in the transaction documents and relevant official records. Official contact channels should also be confirmed independently when negotiating a high-value asset.

- The homepage displays individual listings with model years and prices, including vehicles and machinery offered for six-figure Brazilian-real amounts.
- The homepage states that advertisements and advertisers are validated, but the supplied content does not describe the verification methodology or buyer-remediation process.
- The navigation provides “Quem Somos,” “Fale Conosco,” policy, login, and seller-advertising pathways that can support transaction-level due diligence.

Summary Verdict

The website is legitimate, established, and trustworthy, with consistent commercial identity, substantial historical continuity, clean reputation findings, and benign observed behavior. No contradictory evidence undermines normal use of the marketplace.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer, with observed edge addresses shielding the origin server from direct exposure. This is a conventional protective control that reduces infrastructure exposure, although it is a security mitigation rather than independent proof of business legitimacy.

Closing Assessment

Normal browsing, account login, listing activity, and standard platform use are appropriate; high-value transactions should follow ordinary marketplace controls, including independent seller and asset validation and traceable payment arrangements.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about trucadao.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
