Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Truehost is a Kenyan web-hosting and digital-services marketplace offering domains, shared and dedicated hosting, VPS infrastructure, business email, website builders, ecommerce tools, SSL certificates, cloud applications, and related professional services.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, confirmed blacklist findings, or malicious reputation findings were observed. The homepage presents a coherent commercial hosting business with identifiable services, pricing, support information, and refund-related claims; behavioral review found no login form, sensitive form, wallet activity, hidden form, or cloaking. The site's continuity and clean external reputation support an established identity rather than a transient or deceptive operation.

- Homepage: coherent commercial presentation of hosting, domain, infrastructure, support, and refund services with no listed red flags.
- Archive history: domain registered 2014 (~12.51 years old); 264 snapshots spanning 2014–2026 (13 years tracked).
- Homepage behavior: no sensitive form, hidden form, password-external form, wallet connection, or brand-impersonation signal.

Regulatory Verification Notes

The homepage describes a legitimate technology-services business rather than a regulated financial provider. It advertises domain registration, shared hosting, Kenyan `.ke` domains, VPS and dedicated servers, business email, SSL certificates, online-shop tools, AI website building, developer services, local SEO, affiliate commissions, and managed cloud applications. No specific financial, banking, investment, or regulatory-license claim is evidenced; this is a transparency item for institutional procurement review, not an indication of impersonation or fraud. Third-party broker matching was absent.

- Homepage: publishes service categories, pricing, support information, infrastructure claims, partner/accreditation references, and money-back guarantees.
- Domain registration: registrar is Truehost AI; creation date is 2014-01-30T17:12:02Z and expiration date is 2029-01-30T17:12:02Z.
- Hosting infrastructure: served from AS13335 (Cloudflare, Inc., US).
- TLS certificate: issued by WE1, domain-validated (DV), valid to 2026-10-24.

What to Verify Next

For enterprise onboarding, confirm the contracting entity, applicable service terms, refund conditions, data-processing obligations, and any sector-specific authorization required for the intended use. Confirm official support and billing channels through independently sourced corporate contact details before executing material procurement or migration activity.

- Homepage: identifies the operating offer as web hosting and digital services rather than a financial product.
- Homepage: provides pricing, support references, and money-back-guarantee language for commercial review.
- Service pages indicated by the homepage: review the applicable terms, privacy, acceptable-use, and service-level provisions before contracting.

Summary Verdict

Truehost presents as a legitimate, established, and trustworthy technology-services provider. The evidence supports normal interaction, including account login and standard service use, with no observed contradiction requiring a heightened scam or impersonation posture.

Infrastructure Integrity

Cloudflare CDN/WAF protection fronts the site, with observed traffic terminating on Cloudflare edge infrastructure and no origin candidate exposed in the analysis. This reduces direct origin exposure and is a mitigating security characteristic, although protective infrastructure alone is not proof of legitimacy.

Closing Assessment

Normal account use and standard commercial engagement are appropriate, subject to the usual procurement, contractual, and operational checks for an enterprise service provider.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of truehost.co.ke.

- The request stayed on truehost.co.ke. It was not redirected to another domain. CLEAR
- Registration is published under Truehost AI. CLEAR

- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-01-30. CLEAR
- The earliest public archive of this site is from 2014-03-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about truehost.co.ke at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
