Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Truehost is a Nigerian commercial technology provider offering web hosting, domain registration, VPS and dedicated servers, business email, SSL certificates, website builders, ecommerce services, cloud infrastructure, and digital-marketing support for businesses.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent commercial hosting business, while technical behavior showed no login form, hidden sensitive form, wallet connection, clipboard manipulation, or cloaking behavior. External reputation checks were clean, with no malicious or suspicious detections.

- The homepage identifies a consistent hosting-provider business model and contains substantial service and support content.
- The homepage contains no login form, hidden sensitive form, or untrusted form destination.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist finding.

Regulatory Verification Notes

The site's public service presentation is commercially detailed, but its reviewed pages do not state a regulatory license or registration number. For a hosting and infrastructure provider, this is a transparency item for ordinary corporate verification rather than evidence of deception. The domain is established, registration is recorded through TRUEHOST CLOUD, and the site uses valid transport encryption issued by WE1. No adverse broker-related reputational match was identified.

- Domain registered on 2016-10-06 and approximately 9.82 years old; expiry recorded as 2027-10-06.
- Served through AS13335, operated by CLOUDFLARENET — Cloudflare, Inc., US.
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-28.
- The homepage describes hosting, domains, email, SSL, website-building, ecommerce, and digital-marketing services but does not state a regulatory license number.

What to Verify Next

Before a material commercial engagement, the contracting entity, applicable business registration, refund terms, and service-level commitments should be confirmed through the provider's formal documentation and an independent corporate source. Support and payment channels should also be confirmed through the site's published customer-service process.

- The homepage publishes pricing, support claims, partner references, and refund terms.

- The homepage links to established payment and communications channels, including Paystack, Stripe, and WhatsApp.
- The site promotes affiliate and reseller programs, making confirmation of contractual terms relevant for business customers.

Summary Verdict

The website presents as a legitimate, established, and trustworthy commercial technology provider with no observed scam or impersonation contradiction. Its content, technical posture, clean external reputation, and coherent business model support normal interaction, including account login and standard use.

Infrastructure Integrity

Cloudflare CDN and WAF protection mediate the observed traffic, and all observed addresses were CDN edge servers rather than exposed origin infrastructure. This reduces direct origin exposure and is a mitigating security characteristic, although protective infrastructure alone does not establish legitimacy.

- Cloudflare protection was observed across four edge addresses, with zero likely origin candidates.
- The infrastructure resolved through Cloudflare’s CDN/WAF service in the United States.

Closing Assessment

Normal account use and standard service engagement are appropriate, with routine commercial checks proportionate to the value and contractual significance of the intended engagement.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of truehost.com.ng.

- The request stayed on truehost.com.ng. It was not redirected to another domain. CLEAR
- Registration is published under TRUEHOST CLOUD. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-10-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about truehost.com.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
