- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Trusted Shops is an established digital-trust services platform presenting Trustmark certification, buyer protection, authentic reviews, legal services, business solutions, and the eTrusted enterprise feedback SaaS platform. Its apparent business model combines consumer trust services with paid corporate and enterprise solutions that help organizations demonstrate credibility, manage compliance-related needs, and analyse customer experience.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate identity and clearly differentiated personal, business, and enterprise services, while the observed pages contain no phishing indicators, hidden forms, deceptive redirects, wallet-drainer behavior, or brand-impersonation signals. External reputation checks were clean, and the site's long operating history and extensive archival continuity support the conclusion that this is the established service represented on the website.

- The homepage identifies Trusted Shops and presents Trustmark, reviews, buyer protection, legal services, certification, feedback, and eTrusted offerings.
- The homepage contained no sensitive forms, hidden forms, suspicious destinations, or detected brand-impersonation indicators.
- The domain was registered in 1999 and is approximately 26.76 years old.
- The web archive records 4,446 snapshots across 27 tracked years, from 2000-08-30 through 2026-06-17.

Regulatory Verification Notes

The site presents corporate and enterprise services rather than claiming a specific financial-services license. No license or registration number is identified in the supplied site evidence, so any regulated activity associated with a particular service should be confirmed against the relevant official register. This is a disclosure and verification matter, not evidence of impersonation or fraud. The domain is registered through united domains AG, and its transport security uses a valid certificate issued by Amazon RSA 2048 M04.

- The site's hosting infrastructure is identified as AS16509, operated by AMAZON-02 - Amazon.com, Inc., US.
- The TLS certificate uses DV validation, is issued by Amazon RSA 2048 M04, and is valid through 2026-11-02.
- The domain registrar is united domains AG, with registration dated 1999-11-05.
- No matching third-party broker record was identified.

What to Verify Next

For any service that may be subject to sector-specific regulation, the applicable authorization should be checked directly with the relevant regulator or registry. Contracting entities should also confirm the official support and account channels through an independently sourced corporate contact route before executing unusual or high-value transactions.

- The homepage provides separate personal, business, and enterprise navigation paths.
- The site identifies customer support, account access, and enterprise-demo pathways.
- The business model is described as corporate and B2B-oriented, with no specific financial license claim recorded.

Summary Verdict

Trusted Shops presents a legitimate, established, and trustworthy corporate service with a coherent identity, clean reputation, mature operating history, and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with observed edge addresses associated with Amazon’s hosting network and no likely origin candidate exposed in the analysis. This provides a meaningful protective layer against direct origin exposure, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Standard browsing, account use, and ordinary business engagement are appropriate; only activity requiring sector-specific authorization should receive the corresponding independent regulatory confirmation.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of trustedshops.com.

- The request stayed on trustedshops.com. It was not redirected to another domain. CLEAR
- Registration is published under united domains AG. CLEAR

- DNS for this domain is served by awsdns-52.org, across 4 name servers. NOTED
- The registration is paid up to 2026-11-05. NOTED
- The earliest public archive of this site is from 2000-08-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about trustedshops.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
