Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official Taiwan Television (TTV) platform, presenting news, television programming, schedules, live broadcasts, on-demand video, financial content, and audience services through an advertising-supported national broadcaster model.

Scam/Impersonation Risk

No contradictions were observed. The homepage's extensive broadcaster-specific content, including news coverage, named programs, channel listings, live streams, and station announcements, is coherent with the stated Taiwan Television identity and does not present phishing, malware, crypto, wallet-connect, or sensitive-login behavior. External reputation checks found no malicious or suspicious detections, no confirmed blacklist result, and no reported abuse activity; this convergence supports a legitimate and established online presence rather than an impersonation or scam operation.

EVIDENCE

- The homepage identifies Taiwan Television through broadcaster-specific news, program schedules, channel listings, live streams, and video content.
- The domain was registered in 1997 and is approximately 29.3 years old.
- Historical records contain 5,000 archive snapshots spanning 1998–2022, with 25 years tracked.
- External screening recorded 0 malicious detections, 0 suspicious detections, and no blacklist result.

Regulatory Verification Notes

The reviewed material supports a coherent corporate identity for Taiwan Television Enterprise Co., Ltd. and includes station governance content such as self-regulatory policies, an editorial code, and a cybersecurity policy statement. No broadcasting license number or external regulatory authorization is presented in the supplied page findings, so licensing remains a routine verification matter rather than evidence of deception. The site's advertising and consent-management model is visible through its consent platform and vendor disclosures; a third-party broker dataset produced no matching result, although that absence is contextual only and is not a licensing determination.

EVIDENCE

- The transport certificate identifies the subject organization as TAIWAN TELEVISION ENTERPRISE CO., LTD.
- Domain registration records list TWNIC as registrar and Taiwan Television Enterprise Co., Ltd. as the registrant organization.
- Transport telemetry identified AS3462, HINET – Data Communication Business Group, TW.
- The TLS certificate is issued by Sectigo RSA Organization Validation Secure Server CA, uses OV validation, and is valid to 2026-09-15.

What to Verify Next

For formal institutional onboarding, confirm the broadcaster's current legal and authorization details through the relevant official corporate or broadcasting registry. Review the site's consent-management settings and applicable privacy disclosures before enabling optional advertising or analytics categories. Confirm that any business correspondence or commercial arrangement is initiated through contact details published on the site and independently corroborated through the broadcaster's established public channels.

EVIDENCE

- The homepage exposes links to self-regulatory, editorial, and cybersecurity policy material that can be reviewed during onboarding.
- The homepage presents an IAB TCF consent-management platform covering advertising and tracking vendors.
- The reviewed site behavior contained one consent form and no sensitive form, password-external form, or wallet interaction.

Summary Verdict

This is a legitimate, established, high-trust website with a coherent institutional identity, long-term continuity, clean external reputation, and no observed scam or impersonation contradictions. Normal interaction, including account login where offered and standard use of the site, is appropriate.

Infrastructure Integrity

The site's infrastructure facts show hosting through APBT-AS-TW – Asia Pacific Broadband Fixed Lines Co., Ltd. on AS24154 in Taiwan, with four likely origin IPs and no detected CDN or WAF edge layer. The absence of a detected CDN/WAF is an infrastructure characteristic and does not undermine the site's established identity or legitimacy.

Closing Assessment

Normal browsing, account login, and standard use are appropriate; institutional users should continue applying their ordinary procurement, privacy, and account-security controls.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ttv.com.tw.

- The request stayed on ttv.com.tw. It was not redirected to another domain. CLEAR
- Registration is published under TWNIC. CLEAR
- DNS for this domain is served by 159.50. NOTED
- The registration is paid up to 2028-05-31. CLEAR
- The earliest public archive of this site is from 1998-11-11. CLEAR
- It is hosted on HINET, from a server in TW. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ttv.com.tw at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
