

Is tv2.no legit? TrustSniffer's high-trust assessment: 90/100

tv2.no

Verdict

90

OUT OF 100

HIGH TRUST

tv2.no appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Norwegian news site article landing page with headlines and navigation for news, sport, entertainment and TV-related content. Contains editorial content, contact info and site navigation; typical professional news layout.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This website is a Norwegian TV 2 news and media portal presenting continuously updated coverage across news, sport, entertainment, video, television programming, weather and related audience services. Its apparent business model is that of an established commercial publisher supported by advertising, subscriptions or memberships, sponsored content and ancillary services.

Scam/Impersonation Risk

No contradictions were observed: the page presents a coherent editorial news environment, contains no phishing indicators or malicious content findings, and external reputation checks returned no confirmed blacklist, phishing or malware signal. Dynamic testing did observe hidden forms, inline scripts and external network activity, but no password-exfiltration forms, wallet interactions, clipboard manipulation or cloaking; in the context of a media site, these observations do not establish impersonation. An isolated, zero-confidence abuse report relates to the resolved commercial IP infrastructure associated with the site rather than to a confirmed malicious page, and therefore does not outweigh the broader evidence. The real-world operator identity remains independently unverified, so the site should be described as apparently legitimate rather than identity-proven.

EVIDENCE

- The homepage is identified as a news/article page with editorial navigation for news, sport, entertainment, video, television programming and weather; no red flags were recorded.
- The domain was registered on 1999-11-15 and is approximately 26.76 years old.
- Historical records show 5,000 snapshots spanning 1998–2017, covering 20 tracked years, with a maximum recorded gap of 1 year.
- External checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing result, and no confirmed blacklist result; the resolved IP had 1 abuse report with a confidence score of 0.

Regulatory Verification Notes

The available evidence is consistent with an established commercial media publisher, not a broker, exchange or other financial service requiring the type of licensing normally associated with investment platforms. The site's navigation includes Contact, About TV 2 and Privacy information, while no financial license claim or authorization number is evidenced; this limits regulatory verification but is not evidence of a scam for the stated publishing model. The registrar and transport certificate align with the TV 2 identity presented by the site,

although independent real-world operator verification has not been completed. No matching signal was returned from the reviewed broker-reputation context.

EVIDENCE

- Domain registration lists TV 2 GRUPPEN AS as registrar.
- The site is served from AS39787, identified as TV2-NORWAY - TV 2 AS, NO.
- The TLS certificate is OV-validated, issued by Buypass Class 2 CA 2 for TV 2 AS, and valid until 2026-10-14.
- The page content describes a commercial publisher monetized through advertising, audience subscriptions or memberships, sponsored content and related services; the content assessment records a low informational risk profile.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the intended service is the official TV 2 service through a trusted offline or previously established corporate channel. Subscription terms should be reviewed for cancellation, renewal, refund and dispute provisions, and payment should use an instrument with appropriate consumer or commercial protection. Where a particular offering introduces a regulated service or financial transaction, its relevant authorization should be confirmed independently before engagement.

EVIDENCE

- The homepage provides Contact, About TV 2, Privacy, Help and account-navigation sections that can be compared with independently sourced corporate information.
- The site presents a login and account area, making confirmation of the correct service context relevant before credential submission.
- The stated business model includes subscriptions or memberships and sponsored or related services, making terms and payment-protection review relevant to prospective transactions.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradiction. The classification is strong, but it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The site resolves directly to a single origin, with no CDN or WAF detected. This provides less intermediary shielding than an edge-fronted deployment, but the direct hosting arrangement is a neutral infrastructure characteristic and does not, by itself, indicate maliciousness.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credentials or payments should be preceded by the ordinary independent identity, terms and payment-protection checks appropriate to the intended account or transaction.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 5.44.65.150 (NO TV2 FRONT LB SERVICES, Commercial), 0% confidence.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tv2.no.

- The request stayed on tv2.no. It was not redirected to another domain. CLEAR
- Registration is published under TV 2 GRUPPEN AS. CLEAR
- DNS for this domain is served by tv2.no, across 3 name servers. NOTED
- The earliest public archive of this site is from 1998-01-23. CLEAR
- It is hosted on TV2-NORWAY, from a server in NO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tv2.no at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
