Full analysis

Overview

The website is an established Vietnamese digital-streaming service offering live television, films, sports, television shows, anime, children's programming, and subscription packages under the TV360 brand, with an apparent business model combining paid access with a broader Viettel-operated media service.

Scam/Impersonation Risk

No identity contradictions, impersonation, phishing, or other scam indicators were observed. The homepage presents a coherent TV360 service identity, while observed browser activity showed no credential diversion, concealed forms, wallet-related behavior, clipboard manipulation, cloaking, or suspicious scripts. Independent reputation checks were clean, and the site has a substantial global traffic footprint, supporting the conclusion that this is the legitimate TV360 service rather than a deceptive brand imitation.

- The homepage consistently identifies the service as TV360 and attributes its operation to Viettel.
- Threat-reputation assessment recorded zero malicious and zero suspicious detections, with no external threat-list finding.
- Interactive testing completed successfully and found no hidden forms, external password forms, cloaking, wallet-drainer behavior, or clipboard hijacking.
- The domain ranks 58,842 in the measured global traffic index.

Regulatory Verification Notes

The homepage provides a comparatively strong set of corporate and service disclosures: a governing organization, physical address, customer-support hotline, business-registration information, media-licensing details, service agreement, privacy information, and cookie controls. These disclosures materially support institutional accountability. Their presence is evidence of transparency, although the supplied material does not independently establish the current status of the referenced registration or media authorization.

- The homepage footer identifies Viettel as the governing organization and displays an organizational address and support telephone number.
- The homepage publishes business-registration and media-license details alongside service terms and privacy information.
- The site is served from AS21859 (ZEN-ECN — Zenlayer Inc., US).
- The site's TLS certificate was issued by GlobalSign RSA OV SSL CA 2018 with organization validation for "VIETTEL TELECOM CORPORATION - BRANCH OF VIETTEL GROUP," valid to 2026-11-14.

What to Verify Next

For formal onboarding or procurement, the named operating entity and published registration and media-authorization details should be matched against the relevant Vietnamese official records. Commercial reviewers should also confirm subscription pricing, renewal, cancellation, refund, and content-entitlement terms before approving recurring payments or enterprise use.

- The site provides sufficient corporate identifiers on the homepage to support an independent registry comparison.
- The homepage exposes service-agreement and privacy materials suitable for legal, billing, and data-handling review.
- Cookie controls are presented to visitors, enabling review of consent choices during onboarding.

Summary Verdict

The website is legitimate, established, and trustworthy, with coherent institutional identity, clean external reputation, meaningful public usage, and benign observed behavior. Normal interaction, including account login, subscription management, and standard use, is appropriate.

Infrastructure Integrity

The identified data-centre hosting environment and valid organization-validated transport certificate provide sound baseline protection for availability and encrypted communications. These controls mitigate technical exposure but are supporting safeguards rather than standalone proof of legitimacy.

Closing Assessment

Prospective users may engage with the service normally, while regulated organizations should complete routine supplier, contractual, and data-protection due diligence before institutional adoption.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tv360.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
