

Is tv4.se legit? TrustSniffer's high-trust assessment: 100/100

tv4.se

Verdict

100

OUT OF 100

HIGH TRUST

tv4.se appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

TV4 Swedish news page with editorial headlines across politics, sports, economy and international news. Includes cookie/consent interface and advertisers/partners disclosures; no solicitation for money or sensitive credentials found.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

tv4.se is an established Swedish news and media website presenting editorial coverage of politics, sport, economics, international affairs, entertainment, and video programming. Its apparent business model is an ad-supported publisher that monetizes editorial content, streaming links, advertising partnerships, and sponsored content rather than soliciting funds or sensitive credentials from visitors.

Scam/Impersonation Risk

No contradictions were observed between the site's stated purpose, its historical presentation, and its current content. The homepage functions as a news portal, with headlines, editorial categories, TV4 Play references, cookie controls, advertising information, responsible-editor information, and contact navigation; it contains no login form, payment solicitation, wallet connection, or sensitive-data collection mechanism. A page-level similarity heuristic associated the content with "t.me," but this was not corroborated by the page's subject matter, domain context, or other indicators and therefore does not establish impersonation. Browser observation likewise found no cloaking, hidden forms, credential redirection, wallet activity, or malicious behavior. A published contact-channel integrity anomaly is present: "No suspicious contact address was identified in the supplied page findings" is not applicable; the supplied findings contain no suspicious email entry. The available evidence therefore supports an apparently legitimate, low-risk site while leaving the real-world operator identity independently unverified.

EVIDENCE

- The homepage is titled "Nyheter från TV4 - tv4.se" and presents news sections covering politics, sport, economy, international affairs, entertainment, and television.
- Domain registration: 1994-08-19; approximately 32 years old; registrar CSC Corp Domains.
- Web archives contain 5,000 snapshots spanning 1996–2021, covering 26 tracked years.
- The homepage returned successfully with no login form, hidden form, password-external form, wallet activity, cloaking, or clipboard-hijacking behavior observed.

Regulatory Verification Notes

The site presents the profile of a media publisher rather than a financial, investment, or regulated-services provider, so no financial licence claim or licence number is apparent in the supplied content. Its navigation includes cookie policy, cookie settings, terms, advertising, press, employment, publicistisk foundation, responsible editors, and contact information, which are relevant publisher disclosures. The available evidence is

consistent with an established website, but the operator's real-world identity is not independently verified; any institutional engagement should therefore treat the publisher identity as apparent rather than proven. No matching broker-reputation record was identified, which is contextual support but not a legal or regulatory determination.

EVIDENCE

- The site's footer navigation exposes "Cookie-policy," "Användarvillkor," "Publicistisk grund," "Ansvariga utgivare," "Press," and "Kontakta TV4."
- Hosted on AS16509, Amazon.com, Inc. (AMAZON-02), US.
- TLS certificate: Amazon RSA 2048 M04, domain validation (DV), valid to 2026-11-23.
- The page describes advertising, commercial partnerships, sponsored content, and video streaming links rather than a regulated financial service.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the publisher's legal identity and official contact channels through corporate records or an offline route, and review the applicable terms, privacy materials, and payment-protection arrangements where a transaction is involved. Any account creation or purchase should remain limited to the official domain and expected service flow, with the transaction counterparty and return or cancellation terms checked independently.

EVIDENCE

- Independent operator identity verification is not complete in the supplied assessment.
- The site exposes dedicated terms, privacy, publisher-governance, press, and contact navigation for independent review.
- The stated business model is advertising-supported publishing, so payment checks are relevant only where a separate commercial transaction is introduced.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. The site's content, continuity, technical stability, and clean external reputation converge on normal media-publisher use, while independent attribution of the real-world operator remains unresolved.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with observed edge addresses in AS16509 and no origin candidate identified in the supplied infrastructure analysis. This is a mitigating exposure-control measure, not proof of legitimacy; the hosting provider is Amazon.com, Inc., US, and the infrastructure was successfully resolved.

Closing Assessment

Routine browsing is proportionate to the assessed posture; before submitting credentials or making payments, ordinary independent checks of the counterparty, terms, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tv4.se.

- The request stayed on tv4.se. It was not redirected to another domain. CLEAR
- Registration is published under CSC Corp Domains. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2026-12-31. NOTED
- The earliest public archive of this site is from 1996-12-31. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tv4.se at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
