Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

TV4 Play is a Swedish consumer streaming service presenting television programs, films, news, sports, advertising-supported viewing, and paid Plus subscription options, with account creation and login functionality for accessing content and managing service use.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent TV4 Play media service with program listings, age ratings, subscription access, account functionality, cookie consent, and support navigation; no phishing, credential-harvesting, cryptocurrency, or brand-impersonation indicators were identified. External reputation checks were clean, and the domain shows sustained historical continuity consistent with an established service rather than a recently created or repurposed site.

EVIDENCE

- The homepage presents TV4 Play programming, subscription access, account creation, login, cookie consent, and support navigation without identified red flags.
- The domain was registered on 2009-02-11 and is approximately 17.5 years old.
- Web archives contain 5,000 snapshots spanning 2009–2022, covering 14 tracked years.
- The domain has a recorded traffic rank of 46950 and is within the top one million sites.

Regulatory Verification Notes

The service operates as a consumer media platform funded through advertising, subscriptions, and partner integrations rather than as a financial or investment service. The supplied page material does not present a licensing claim or license number; this is a limited disclosure point for procurement or jurisdiction-specific review, not evidence of deceptive identity. The domain is registered through CSC Corp Domains, while the reviewed content provides a clear consumer-facing service identity and ordinary subscription mechanics.

EVIDENCE

- The homepage describes program categories, channels, sports, support, and “Plus” packages for paid access.
- No license authority or license number is presented in the supplied page-level material.
- Registration is recorded through CSC Corp Domains.
- The site uses a valid DV TLS certificate issued by Amazon RSA 2048 M04, valid to 2026-12-02.

What to Verify Next

Before organizational procurement or a paid subscription, confirm the applicable plan terms, renewal and cancellation conditions through the site’s package information, and obtain any required contracting-entity details from the provider’s official support route. Review the cookie and privacy choices presented during access, and retain the service’s published confirmation of any transaction or account change. For jurisdiction-specific compliance requirements, confirm directly with TV4 which consumer-service terms apply.

EVIDENCE

- The homepage exposes dedicated “Våra paket” and “Support” navigation for plan information and assistance.
- The homepage presents a cookie-consent mechanism and privacy-related controls.
- The account workflow includes dedicated account creation and login functions.

Summary Verdict

The overall posture is **high trust** and consistent with a legitimate, established consumer service. Normal interaction, including account login, subscription management, and standard use, is appropriate.

Infrastructure Integrity

The site is served from Amazon infrastructure, including AS16509, with CDN-style delivery characteristics. This is a positive operational signal for availability and infrastructure resilience, although protective hosting remains a mitigating factor rather than proof of legitimacy.

Closing Assessment

Standard account use and ordinary subscription activity are appropriate; only routine confirmation of plan terms and transaction records is warranted for normal service engagement.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tv4play.se.

- The request stayed on tv4play.se. It was not redirected to another domain. [CLEAR](#)

- Registration is published under CSC Corp Domains. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2027-02-11. NOTED
- The earliest public archive of this site is from 2009-04-25. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tv4play.se at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
