Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is the official online portal of a television channel, presenting news articles, video programming, a television schedule, and live broadcast content for a broad public audience. Its apparent business model is a conventional news-and-media service supported by advertising and institutional or governmental partnerships.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent television-channel identity, with news, scheduled programming, a video library, and live broadcasting rather than financial, investment, or credential-harvesting functionality. The captured site contains no login form, hidden sensitive form, wallet interaction, or untrusted form destination; its only detected form is a contact-feedback function. External reputation checks recorded zero malicious detections, zero suspicious detections, and no phishing indication. The domain is also long-established, which is consistent with the stated media identity. A published contact address, `info@tvc.come`, is a contact-channel integrity anomaly because the malformed top-level domain could break delivery or represent a possible typosquat; this is a minor anomaly, not evidence of impersonation.

EVIDENCE

- Homepage title and content identify the service as “ТВ Центр — Официальный сайт телеканала” and provide news, video library, television schedule, and live-broadcast sections.
- Homepage form analysis found 1 contact-feedback form, 0 sensitive forms, and 0 login forms.
- Domain registration: 1998-10-16; age 27.84 years; registrar RU-CENTER-RU.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no phishing indication.

Regulatory Verification Notes

The site’s editorial and registration references support its stated identity as a media outlet, and no conflicting legal identities were observed. The available evidence does not establish a third-party regulatory designation, and the site does not claim a specific license or provide a license number; this is a regulatory-disclosure item for confirmation where media authorization requirements apply, not an indication of fraud. The overall identity and legitimacy assessment remains strong because the content is substantial and internally consistent, the domain has a substantial public traffic footprint, and the transport layer uses a recognized certificate issuer.

EVIDENCE

- The homepage and editorial information reference registration and editorial details for the television-channel service.
- Served from AS51115, HLL-AS — HLL LLC, RU.
- TLS certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, validation level DV, valid to 2026-09-30T13:12:56+00:00.
- Public traffic measurement records rank 45730, within the top 1 million domains.

What to Verify Next

For formal media, procurement, or institutional engagement, confirm any applicable broadcasting or media authorization directly with the relevant official registry. Independently cross-check the site's editorial and contact channels through a recognized corporate or public-sector source before relying on them for contractual, regulatory, or high-value communications.

EVIDENCE

- The available legal and editorial material references registration information but does not state a specific license number.
- The homepage provides a contact-feedback function suitable for independent channel cross-checking.
- The site presents itself as an official television-channel portal, making the applicable media registry the relevant verification authority.

Summary Verdict

The website presents a high-trust posture consistent with a legitimate, established media organization. Its identity, content model, technical operation, and external reputation converge without observed contradiction, and normal interaction—including account login where offered and standard site use—is appropriate.

Infrastructure Integrity

The site resolves through direct hosting infrastructure with two likely origin addresses and no detected CDN or WAF layer. This is a conventional, identifiable hosting arrangement and does not itself indicate malicious activity; the absence of an intermediary protection layer simply means that infrastructure-level mitigation is limited.

Closing Assessment

Routine browsing, account access where offered, and standard use may proceed; formal institutional engagement should follow the ordinary registry and contact-channel checks applicable to the intended business relationship.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tvc.ru.

- The request stayed on tvc.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 5 name servers. NOTED
- The registration is paid up to 2026-10-31. NOTED
- It is hosted on HLL-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tvc.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
