

Is tvmovie.de legit? TrustSniffer's high-trust assessment: 100/100

tvmovie.de

Verdict

100

OUT OF 100

HIGH TRUST

tvmovie.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 75%.

What this site appears to be

German TV Movie homepage offering current television listings, streaming discovery, entertainment and celebrity news, cinema coverage, technology articles, newsletters, apps, and magazine subscriptions. The supplied page content presents a coherent, established editorial media service with legal, privacy, contact, and accessibility links and no strong security-abuse indicators.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established German television-guide and entertainment-media service presenting broadcast schedules, streaming discovery, film and series coverage, celebrity and entertainment news, consumer-technology articles, newsletters, apps, and magazine subscriptions, with an apparent business model based on advertising, commercial product coverage, and paid subscription offerings.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing activity, or other scam indicators were observed. The site's coherent editorial purpose, extensive historical continuity, meaningful global traffic footprint, and clean external reputation strongly support its authenticity. Interactive testing identified neither credential-harvesting forms nor deceptive redirection, cloaking, wallet activity, clipboard manipulation, or suspicious scripts.

- The homepage contained no login form, sensitive-data form, untrusted form destination, or suspected brand impersonation.
- Confirmed reputation checks recorded 0 malicious and 0 suspicious detections, no search-browsing safety hit, no external threat listing, and no reported infrastructure abuse.
- Domain age: approximately 29.6 years, corresponding to establishment in 1996.
- Historical records contain 5,000 archive snapshots spanning 1996–2025, covering 30 tracked years without evidence of suspicious repurposing or semantic drift.

Regulatory Verification Notes

TV Movie presents an editorial media and subscription service rather than a regulated financial or brokerage business; financial licensing is therefore not an apparent prerequisite for its stated activities. The homepage provides legal, privacy, contact, and accessibility pathways consistent with an established German consumer-media service. No third-party broker profile was matched, which is neutral and appropriate to the site's non-broker business model.

- The homepage links to legal, privacy, contact, and accessibility information.
- The homepage describes magazine and PUR subscriptions alongside newsletters and related media services.
- Hosting is provided from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site's transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid until 2026-10-07.

What to Verify Next

For institutional onboarding or commercial engagement, the publisher named in the legal notice should be matched to contracting and invoicing documentation. Subscription purchasers should review the applicable price, renewal, cancellation, and privacy terms at the point of purchase, while organizations planning advertising, syndication, or data-sharing arrangements should obtain the relevant contractual and data-processing terms through the site's official channels.

- The legal pathway provides the appropriate site location for confirming the responsible publisher before contracting.
- The subscription pages are the relevant source for offer-specific commercial and cancellation conditions.
- The privacy page is the appropriate source for assessing personal-data handling associated with newsletters, apps, and paid services.

Summary Verdict

TV Movie is a legitimate, long-established, and trustworthy editorial website. Its identity, historical provenance, reputation, content maturity, and technical operation converge without contradictory risk signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The service operates behind AWS CDN/WAF infrastructure, with all three observed addresses belonging to Amazon edge infrastructure and no direct origin address exposed during the assessment. This architecture mitigates direct server exposure and supports availability and transport security, although protective infrastructure is a security control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with the website normally, applying routine consumer diligence to subscription terms and ordinary institutional contracting controls where relevant.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tvmovie.de.

- The request stayed on tvmovie.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-40.org, across 4 name servers. NOTED
- The earliest public archive of this site is from 1996-12-21. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tvmovie.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
