The page as captured

https://tvn.pl/

What tvn.pl served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

tvn.pl is a Polish television, news, and entertainment portal presenting programme schedules, current-affairs and celebrity articles, interviews, videos, recipes, weather, casting information, and listings for TVN-related services. Its apparent business model is a mainstream commercial media operation supported primarily by advertising, sponsored content, audience measurement, and potentially subscription or player services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents substantial, coherent editorial and entertainment content rather than a deceptive investment, payment, or credential-harvesting proposition; the captured interaction surface contained no login form, hidden form, sensitive form, wallet activity, or untrusted destination. External reputation results were clean, and the site's established registration continuity and strong traffic footprint are consistent with an established online property. The available evidence therefore supports a low scam and impersonation risk assessment, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage is identified as “TVN - filmy, seriale, wywiady, gwiazdy - TVN” and contains extensive programme, news, interview, video, and entertainment navigation.
- External checks recorded 0 malicious and 0 suspicious detections, with no external blocking-list hit; the domain was ranked 15992 and was within the top 1 million websites.
- Domain registration: 1997-10-04; age 28.88 years.

Regulatory Verification Notes

The site's apparent activity is media and entertainment rather than a financial or other clearly regulated service. No financial-service license claim or license number was identified in the captured site content; this is a disclosure point to clarify only if the operator presents services that require authorization. The available evidence is consistent with an established website, but the real-world operator identity remains independently unverified. A reputable registrar, known TLS issuer, high page-authority signal, and clean external reputation provide positive legitimacy context without constituting legal or regulatory verification.

EVIDENCE

- The domain is registered through premium.pl Sp. z o.o.
- TLS is issued by Amazon RSA 2048 M01, uses DV validation, and is valid through 2027-01-24.
- The site received a high page-authority signal based on its observed web presence.

What to Verify Next

Before credential or payment interactions, independently confirm that the domain is the official TVN-operated service through a separately sourced official channel. Where an account, subscription, purchase, or other paid feature is involved, review the applicable privacy, terms, cancellation or return information, and payment-protection arrangements; any applicable corporate or regulatory disclosure should also be checked against the relevant public registry.

EVIDENCE

- The homepage displays a “Zaloguj się” sign-in link, while the captured page contained 0 forms and no sensitive form.
- The captured page showed no untrusted form destination and no wallet-connection activity.
- Cookie-consent and advertising functionality were present as standard site features.

Summary Verdict

The overall posture is high trust and low risk. Available evidence is consistent with an established, apparently legitimate website, although it does not independently authenticate the real-world operator behind the domain. No scam, phishing, impersonation, or identity-conflict signal was observed.

Infrastructure Integrity

The website is protected by Amazon CloudFront CDN/WAF infrastructure. Observed resolution included CDN edge servers and a potential origin candidate; this arrangement can mitigate direct exposure of the service

infrastructure, but it is a protective control rather than proof of legitimacy.

EVIDENCE

- Served from AS16509 (Amazon.com, Inc., US); observed server IP 108.156.22.122.
- Amazon CloudFront was detected, with 4 CDN edge IPs and 1 potential origin candidate.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; credential or payment submission should follow the independent operator, consumer-protection, and applicable-disclosure checks outlined above.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tvn.pl.

- The request stayed on tvn.pl. It was not redirected to another domain. CLEAR
- Registration is published under premium.pl Sp. z o.o.. CLEAR
- DNS for this domain is served by awsdns-09.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-31. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tvn.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
