

Is tvnotas.com.mx legit? TrustSniffer's high-trust assessment: 88/100

tvnotas.com.mx

Verdict

88
OUT OF 100

HIGH TRUST

tvnotas.com.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish-language entertainment publication featuring celebrity, influencer, television, and reality-show stories. It contains extensive advertising, Taboola sponsored recommendations, subscription promotion, social-media links, and a consent platform describing data sharing and profiling by numerous advertising partners.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Spanish-language entertainment and lifestyle publication presenting celebrity, influencer, television, reality-show, video, and magazine content, with a business model based on display advertising, sponsored recommendations, personalized advertising, and subscriptions.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious-content indicators were observed. The homepage is consistent with a conventional media publication: it contains substantial editorial content and advertising but no login form, sensitive-data form, cryptocurrency functionality, wallet interaction, hidden forms, or cloaking. Its long domain and archival history materially support provenance, with no substantiated evidence of repurposing into an unrelated or deceptive operation.

- The domain-registration record shows registration on 15 February 2000, making the domain approximately 26.48 years old.
- Web archives contain 5,000 snapshots from 20 June 2000 through 26 December 2025, representing 26 years of tracked history; the historical samples do not establish suspicious repurposing.
- The entertainment-news homepage contained no sensitive form, hidden form, external password form, wallet provider, clipboard hijacking, or cloaking behavior.
- External reputation checks recorded zero malicious and zero suspicious classifications, no malicious safe-browsing result, no external threat-list hit, and no reported abuse.

Regulatory Verification Notes

The observed service is an entertainment publication rather than a financial, brokerage, investment, or cryptocurrency business, so the absence of a financial-services licence claim is not an adverse regulatory signal. The supplied page evidence does not establish the publication's complete corporate or editorial disclosures; this is a limited disclosure-verification point, not evidence of deception. Registration data names an owner and a mainstream registrar, while the transport certificate and established hosting environment provide additional technical assurance without independently proving legal identity.

- The domain-registration record identifies Claudia Anel Valencia as owner, GoDaddy.com as registrar, and 14 February 2027 as the registration expiry date.
- The site is served from AS16509 by AMAZON-02 — Amazon.com, Inc., US.

- The site's transport encryption uses a domain-validated certificate issued by Amazon RSA 2048 M04, valid until 19 November 2026.
- The homepage describes an entertainment-news and magazine service and presents no financial product, token, investment service, or regulatory claim.

What to Verify Next

For institutional onboarding, the publication's legal publisher, editorial responsibility, subscription terms, privacy terms, and official contact channels should be confirmed from the site's applicable notices and then matched to contracting or invoicing documentation. Consent settings should also be reviewed against organizational privacy requirements because the site's advertising model involves profiling and data sharing across a substantial vendor ecosystem.

- The homepage's consent interface describes personalized advertising, cross-site profile creation, precise-geolocation requests, device linking, and data sharing with numerous advertising partners.
- The homepage uses Taboola-sponsored recommendations alongside display advertising and subscription promotion.
- The homepage links to established social platforms including Facebook, Instagram, YouTube, TikTok, Kwai, and X/Twitter.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across provenance, substantive editorial content, clean external reputation, and benign observed behavior. No evidence supplied indicates fraud, impersonation, phishing, malware, or identity conflict.

Infrastructure Integrity

The site is protected through a CDN/WAF arrangement using two observed Amazon edge addresses in the United States; no direct origin-server candidate was exposed. This reduces origin exposure and supports operational resilience, although protective infrastructure is a mitigating security control rather than proof of legitimacy.

Closing Assessment

Normal browsing, subscription activity, account login, and standard use are appropriate, subject to routine organizational privacy and vendor-onboarding controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tvnotas.com.mx.

- The request stayed on tvnotas.com.mx. It was not redirected to another domain. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tvnotas.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
