Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

TV+ is a Turkish subscription streaming service presenting television series, films, live channels, sports, and related content through monthly plans, app-based access, app-store or carrier billing, customer support, and FAQ resources.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent commercial streaming proposition, with no detected phishing, brand-impersonation, malicious-content, or suspicious-page indicators. External reputation checks were clean, and the site has an established historical and traffic presence consistent with a functioning commercial service. The only residual limitation is that the real-world operator identity is not independently verified; accordingly, legitimacy is apparent and evidence-consistent rather than proven.

EVIDENCE

- Homepage analysis recorded no red flags, no suspected brand impersonation, no login form, and no hidden sensitive forms.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist result.
- Domain registration record: 2017-02-22 (~9.47 years old).
- Web archive: 326 snapshots spanning 2014-11-20 to 2026-07-22, covering 13 years with a maximum gap of 3 years.

Regulatory Verification Notes

The site provides substantive commercial information, including subscription pricing, app-store and carrier-billing instructions, support information, and FAQ content. No licensing claim or registration number was identified; for an entertainment subscription service, this is a disclosure point requiring ordinary merchant verification rather than evidence of deception. Available evidence supports an established, apparently legitimate website, while the operator's legal identity and any applicable consumer-service registration remain independently unverified. No adverse broker-reputation match was identified.

EVIDENCE

- Homepage content describes monthly paid access to streaming content and provides subscription and billing information.
- Hosting infrastructure: AS34984, TELLCOM-AS - Superonline İletişim Hizmetleri A.Ş., Türkiye.
- TLS certificate: GlobalSign RSA OV SSL CA 2018, OV validation, valid to 2027-02-10.
- The contact and FAQ content provides customer-support information for service and account questions.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant identity associated with the service, the applicable cancellation and refund terms, and the payment-protection options available through the selected billing channel. Any licensing or registration requirement applicable to the specific subscription arrangement should be checked with the relevant official registry. Official support channels should also be confirmed through an independent source before resolving billing or account disputes.

EVIDENCE

- The homepage displays subscription offers that should be matched against the final checkout amount and renewal conditions.
- The FAQ and support pages provide the stated route for account and billing assistance.
- The site identifies app-store and carrier billing as payment routes, allowing the billing counterparty and dispute process to be checked independently.

Summary Verdict

The overall posture is high trust and low risk, with available evidence consistent with an established, apparently legitimate commercial website. No scam, phishing, impersonation, or other contradictory signal was observed, although the real-world operator identity is not independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by TELLCOM-AS - Superonline İletişim Hizmetleri A.Ş. on AS34984, with no CDN or WAF detected and one likely origin address identified. This represents ordinary direct hosting rather than an edge-protected deployment; the infrastructure evidence does not indicate a confirmed threat condition.

Closing Assessment

Normal browsing and routine service evaluation are proportionate, but independent merchant-identity, cancellation/refund, and payment-protection checks should be completed before submitting credentials or making a paid commitment.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tvplus.com.tr.

- The request stayed on tvplus.com.tr. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by com.tr. [NOTED](#)
- The registration is paid up to 2029-02-21. [CLEAR](#)
- The earliest public archive of this site is from 2014-11-20. [CLEAR](#)
- It is hosted on TELLCOM-AS, from a server in TR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tvplus.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
