

Is tvreport.co.kr legit? TrustSniffer's high-trust assessment: 100/100

tvreport.co.kr

Verdict

100

OUT OF 100

HIGH TRUST

tvreport.co.kr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Homepage of TV리포트, a registered South Korean entertainment-news publication featuring current celebrity, television, music, film, interview, review, and photo stories. The footer provides a legal company identity, newspaper registration, address, business number, telephone number, editorial responsibility, policies, and advertising contact. A consent platform describes extensive personalized-advertising and audience-tracking practices involving numerous vendors.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established South Korean entertainment-news publication presenting current celebrity, television, music, film, interview, review, and photo coverage, with a business model based principally on display and personalized advertising, audience measurement, and advertising enquiries.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or hostile interaction patterns were observed. The domain's long operating history and extensive archival continuity align with the current publishing function, while external threat-reputation checks reported no malicious, suspicious, or abuse findings. The homepage contained no login form, sensitive form, hidden form, deceptive redirection, wallet interaction, clipboard manipulation, or cloaking behavior.

- The domain registration record shows registration in 2004 (~21.91 years old), through Whois Corp., with expiry on 2027-09-11.
- The web archive contains 1,169 snapshots spanning 2007-06-24 to 2026-07-26 (20 years tracked), with no established suspicious repurposing or semantic drift.
- The homepage's entertainment-news content is consistent with its identified publication role and contains no detected brand-impersonation or phishing elements.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and 0 abuse reports.

Regulatory Verification Notes

The homepage footer provides a legal company identity, newspaper registration, physical address, business number, telephone number, editorial responsibility, policy references, and an advertising contact. These are substantive accountability disclosures appropriate to a media publisher. No financial-service or investment activity is presented, so the absence of a financial regulatory licence is not adverse; the relevant governance question is the currency and accuracy of the publication and corporate particulars. The consent mechanism also describes extensive personalized advertising, cross-site profiling, device linking, precise-geolocation requests, and data sharing among numerous vendors, making privacy compliance more relevant than sectoral licensing.

- The homepage footer identifies the publishing company and displays newspaper-registration, business, address, telephone, editorial-responsibility, policy, and advertising-enquiry particulars.
- The consent interface documents personalized advertising, audience tracking, cross-site profile building, device linking, precise-geolocation requests, and broad vendor data sharing.
- The site is served from AS16509 (AMAZON-02 – Amazon.com, Inc., US).
- The site’s transport encryption uses a DV TLS certificate issued by Amazon RSA 2048 M04, valid to 2026-12-09.

What to Verify Next

Institutional due diligence should confirm the footer’s publication-registration and business particulars against the applicable South Korean public records, review the privacy and consent controls for lawful purpose, retention, withdrawal, geolocation, and vendor-sharing practices, and confirm official contact channels through an independently sourced corporate route.

- The homepage provides sufficient corporate and publication particulars to support an independent registry comparison.
- The homepage consent flow identifies multiple data-processing purposes that warrant privacy-control review.

Summary Verdict

The site is legitimate, established, and trustworthy, with strong convergence among its accountable publishing identity, sustained provenance, clean external reputation, and benign observed behavior. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The website operates behind AWS CDN/WAF infrastructure, with all four observed addresses identified as Amazon edge servers on AS16509; no origin candidate was exposed during the assessment. This mainstream protective architecture mitigates direct server exposure, although infrastructure protection is not treated as independent proof of organizational legitimacy.

Closing Assessment

Prospective users may engage with the publication normally, while applying routine privacy preferences appropriate to an advertising-supported media service.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tvreport.co.kr.

- The request stayed on tvreport.co.kr. It was not redirected to another domain. CLEAR
- Registration is published under Whois Corp.(http://whois.co.kr). CLEAR
- DNS for this domain is served by awsdns-14.org, across 4 name servers. NOTED
- The registration is paid up to 2027-09-11. NOTED
- The earliest public archive of this site is from 2007-06-24. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tvreport.co.kr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
