

Is tvzavr.ru legit? TrustSniffer's high-trust assessment: 90/100

tvzavr.ru

Verdict

90

OUT OF 100

HIGH TRUST

tvzavr.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

TVzavr.ru appears to be a Russian-language online TV streaming and program listing site offering free access to live channels, shows and cartoons via embedded third-party streams. Contact email for copyright issues is present; no forms or payment prompts detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

TVzavr.ru is a Russian-language online television and entertainment site presenting live TV channels, programme schedules, shows, and cartoons through free viewing options, including streams embedded from third-party services; its apparent business model is advertising-supported media access rather than a transaction-led service.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, brand-impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent streaming and programme-guide function, with channel listings and scheduled broadcasts rather than requests for credentials, payments, wallet connections, or other sensitive actions. The site's established domain history, strong traffic footprint, and clean external reputation are consistent with an established, apparently legitimate media website, although they do not independently verify the real-world operator. The streaming model still creates ordinary content-rights and third-party-streaming dependencies, but these are not evidence of impersonation or a scam.

EVIDENCE

- The homepage identifies the service as free online TV and lists Russian channels, programmes, shows, and cartoons.
- Page analysis recorded no login form, sensitive form, payment prompt, wallet interaction, cloaking, or suspicious script.
- The domain was registered in 2009 (~17.08 years old) through RU-CENTER-RU and expires on 2027-07-22.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and a Tranco rank of 18143.

Regulatory Verification Notes

The site appears to operate as an informational and entertainment service rather than presenting itself as a regulated financial or investment entity. No independently verified operator identity, licensing position, or corporate authorization is established by the supplied evidence; this is a transparency point for ordinary due diligence, not a scam finding. The available content includes a copyright-contact reference, but the evidence does not establish the rights basis for every embedded broadcast or identify the legal entity responsible for those streams. No adverse broker-reputation match was identified.

EVIDENCE

- The homepage is categorized as Streaming / Media and describes free access to television content supported by advertising or related partnerships.
- The supplied page evidence does not show a license number, regulated authorization, or independently verified legal-entity identity.
- The site's hosting infrastructure resolves through AS49505, SELECTEL - JSC Selectel, RU.
- The site uses a valid DV TLS certificate issued by YE2, valid to 2026-11-03.

What to Verify Next

Before any credential or payment interaction, an organization should independently confirm the operator's legal identity, applicable content-distribution rights, terms of use, and privacy practices through information published outside the site. Any future request for registration, payment, software installation, or access to an external streaming destination should be assessed separately, with payment-protection controls retained and contact channels confirmed through an independent route.

EVIDENCE

- The homepage provides the service description and programme listings but does not independently establish the responsible legal entity.
- The site's stated use of embedded third-party streams makes confirmation of source and distribution rights a relevant diligence step.
- The observed page contained no forms or payment prompts, so any later change in interaction model should be treated as a new condition for review.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk media website and supports a high-trust posture. The principal limitation is that the real-world operator remains independently unverified; this uncertainty does not amount to an observed contradiction or impersonation signal.

Infrastructure Integrity

The site is served directly from SELECTEL - JSC Selectel infrastructure in Russia, using AS49505, with one resolved IP and no detected CDN or WAF layer. Its valid DV TLS certificate provides transport protection, while the direct hosting arrangement should be treated as a descriptive infrastructure characteristic rather than proof of legitimacy.

Closing Assessment

Normal browsing and viewing use is proportionate to the available evidence; independent identity, content-rights, and payment-protection checks should precede any future credential submission or financial commitment.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of tvzavr.ru.

- The request stayed on tvzavr.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 4 name servers. NOTED
- The registration is paid up to 2027-07-22. NOTED
- It is hosted on SELECTEL, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about tvzavr.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
