

Is twentythree.com legit? TrustSniffer's high-trust assessment: 100/100

twentythree.com

Verdict

100

OUT OF 100

HIGH TRUST

twentythree.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate marketing page for TwentyThree, a video marketing and webinar SaaS. Describes products, features, events, and offers trial sign-up and contact channels. Content is promotional and informational about the platform and related releases.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website for TwentyThree, presenting a video marketing and webinar SaaS platform with offerings such as personal video, video libraries, analytics, customer cases, pricing, and enterprise-oriented services; its apparent purpose is to acquire subscription, trial, and enterprise customers for the platform.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity signals were observed. The site's extensive, coherent corporate presentation and established registration and archive continuity are consistent with a genuine, longstanding web presence. The homepage also showed no hidden forms, wallet activity, external password forms, cloaking, or other abuse patterns associated with credential theft or impersonation.

EVIDENCE

- Domain registration records show twentythree.com registered in 1997 and approximately 29.55 years old.
- Archive records show 780 snapshots spanning 1999–2026, with 28 years tracked.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, with no flagged threat vendors and no reported abuse activity for the observed infrastructure.

Regulatory Verification Notes

Available evidence is consistent with an established SaaS business, but the real-world operator identity is not independently verified. The registration record associates the domain with TwentyThree Aps and Abion AB, which supports administrative continuity but does not independently prove that the current website operator is the same legal entity. No financial or other regulated-service license is claimed in the supplied site content; for this apparent software business, that is a disclosure and applicability point rather than evidence of deception. The site's transport and hosting arrangements provide additional technical integrity signals, although they do not establish legal identity.

EVIDENCE

- Registration records identify TwentyThree Aps as the organization and Abion AB as registrar.
- The site is served from AS54113, FASTLY - Fastly, Inc., US.
- The site's TLS certificate is issued by Certainly Intermediate R1, uses DV validation, and is valid to 2026-08-31 03:03:07 UTC.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that TwentyThree Aps is the contracting entity, review the applicable subscription, cancellation, refund, privacy, and data-processing terms, and confirm official support channels through an independent route. Any regulatory or procurement requirement should be checked against the relevant jurisdiction and the specific service being purchased.

EVIDENCE

- The homepage provides Pricing, Sign in, Request trial, and Contact pathways suitable for checking the commercial and support process.
- The site presents cookie-preference and cookie-policy controls, providing a basis for reviewing tracking and privacy disclosures.
- The homepage contains signup and contact forms, with no sensitive form or untrusted form destination detected.

Summary Verdict

The available evidence supports a **high-trust, low-risk posture** for an apparently legitimate and established website. Its coherent business purpose, long-term continuity, clean external reputation, and technically consistent operation converge on normal site legitimacy, while operator identity remains an evidentiary uncertainty rather than a proven attribution.

Infrastructure Integrity

Fastly CDN/WAF protection provides a mitigating layer between visitors and the service infrastructure. All observed addresses were CDN edge addresses, and the origin server IP was not observed in this analysis; this reduces direct origin exposure but is not, by itself, proof of legitimacy.

Closing Assessment

Ordinary browsing and service evaluation are proportionate, with independent confirmation of the contracting entity, commercial terms, support channels, and payment protections completed before credentials or payments are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of twentythree.com.

- The request stayed on twentythree.com. It was not redirected to another domain. CLEAR
- Registration is published under Abion AB. CLEAR
- DNS for this domain is served by awsdns-01.org, across 4 name servers. NOTED
- The registration is paid up to 2027-01-29. NOTED
- The earliest public archive of this site is from 1999-10-11. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about twentythree.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with

a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
