Full analysis

Overview

The Uappi website is an enterprise ecommerce software platform for B2C, B2B, B2B2C, and marketplace operations, presenting governance, integrations, migration support, partner services, customer results, and demonstration-based sales engagement.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or identity-contradiction signals were observed. The site presents a coherent enterprise software proposition, and its historical presence is continuous rather than indicative of suspicious repurposing.

- The homepage presents a professional corporate SaaS proposition with no credential-harvesting or impersonation indicators.
- Domain registration: 2023-05-05; approximately 3.24 years old.
- 199 archive snapshots spanning 2024-02-09 to 2026-06-19, covering 3 tracked years.
- External reputation checks recorded zero malicious or suspicious detections and zero abuse reports.

Regulatory Verification Notes

The homepage identifies the operating entity as WStore Tecnologia S.A. and provides a Brazilian CNPJ, supporting a concrete business identity. The supplied pages do not state a sector-specific license or license number; for an enterprise ecommerce software provider, this is a limited disclosure point requiring procurement-level confirmation rather than an indication of misconduct. No separate broker-reputation match was present.

- The homepage footer identifies “WStore Tecnologia S.A.” and CNPJ 10.831.068/0001-76.
- The site's stated model is enterprise ecommerce software, implementation, integration, and partner services.
- Hosted on AS20473 (AS-VULTR - The Constant Company, LLC, US).
- TLS certificate issued by YR2 with DV validation, valid to 2026-09-12.

What to Verify Next

Procurement teams should confirm the contracting entity and any sector-specific obligations through appropriate official records, then review the commercial agreement, service levels, data-processing terms, and support procedures before deployment.

- The homepage provides a demonstration workflow for prospective customers.

- The homepage includes an ROI and total-cost-of-ownership calculator relevant to commercial evaluation.

Summary Verdict

The overall posture is that of a legitimate, established, high-trust enterprise service. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to likely origin infrastructure, with no CDN or WAF detected and two likely origin IPs identified. This provides less edge-layer shielding than a CDN-backed deployment but does not contradict the strong legitimacy assessment.

Closing Assessment

Prospective customers may proceed with normal account and procurement workflows, applying ordinary enterprise due diligence appropriate to the intended commercial relationship.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uappi.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
