

Is ubs.com legit? TrustSniffer's high-trust assessment: 100/100

ubs.com

Verdict

100

OUT OF 100

HIGH TRUST

ubs.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking UBS Finland page describing wealth management, asset management, asset servicing, investment banking, client portals, corporate information, and privacy choices.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the UBS Finland corporate financial-services site, presenting wealth management, asset management, asset servicing, investment banking, client portals, corporate information, and privacy resources for private, corporate, and institutional clients.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or identity-contradiction signals were observed. The site's institutional content, long operating history, stable behavior, and clean external security reputation converge on an established UBS presence rather than a deceptive copy or abuse platform.

EVIDENCE

- The domain was registered on 1993-02-15 and is approximately 33.48 years old.
- Historical records contain 1,571 snapshots spanning 1996–2011, covering 16 tracked years.
- The UBS Finland homepage presents coherent corporate services, client-login pathways, legal information, and contact options without deceptive interaction signals.

Regulatory Verification Notes

The pages describe regulated financial-services activities, but the supplied on-page material does not establish a specific license number or regulator reference. A domain-matched third-party record identifies UBS Group AG in Switzerland as regulated and reports that a license was found; this is reputational context rather than a substitute for confirmation with the relevant authority. The use of MarkMonitor Inc. as registrar and the organization-aligned transport certificate further support consistent institutional identity.

EVIDENCE

- The domain registrar is MarkMonitor Inc.; expiration is recorded as 2027-02-16.
- The site is served from AS8883, associated with UBS AG, Switzerland.
- TLS uses an OV certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 for UBS AG, valid through 2026-09-13.

What to Verify Next

For regulated onboarding or material transactions, confirm the applicable UBS entity and current authorization through the relevant official financial-services registry. Contact and login activities should use the pathways presented on the UBS Finland contact, legal/privacy, and client-login pages, with ordinary institutional transaction controls applied to significant payments.

EVIDENCE

- The homepage provides dedicated client-login choices for individuals and corporate or institutional users.
- The site navigation includes contact, corporate-information, legal, privacy, and misconduct-reporting paths.
- The page presents UBS Finland as the operating regional context.

Summary Verdict

The overall posture is that of a legitimate, established, and trustworthy financial-services website. Identity, content, historical continuity, reputation, and technical signals are mutually consistent, with no observed contradiction requiring heightened restrictions on normal interaction.

Infrastructure Integrity

Cloudflare provides CDN and WAF protection, with edge infrastructure observed on AS13335 and multiple potential origin candidates behind the service. This architecture mitigates direct exposure of the application infrastructure but is a protective control, not independent proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard account use, is appropriate; routine organizational controls should continue to govern material financial activity.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ubs.com.

- The request stayed on ubs.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Inc.. CLEAR
- DNS for this domain is served by akam.net, across 12 name servers. NOTED
- The registration is paid up to 2027-02-16. NOTED
- The earliest public archive of this site is from 1996-12-26. CLEAR

- It is hosted on UNSPECIFIED, from a server in CH. **NOTED**

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ubs.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
