Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or malicious reputation findings were observed. The homepage presents a coherent retail proposition, while behavioral testing found no login form, hidden sensitive form, wallet interaction, suspicious scripts, or external posting activity. The site's long operating history and consistent archival presence further support continuity of identity rather than opportunistic repurposing.

What to Verify Next

information. Independently confirm the official support and contact channels before resolving unusual account or payment requests.

- Homepage provides country and language selection across a broad international customer base.
- Site content includes delivery FAQs, payment information, customer support, and policy materials.
- Corporate information is presented through the site's "About us" and "Who We Are" areas.

Summary Verdict

Ubuy presents as a legitimate, established ecommerce business with a high-trust posture and no observed contradiction between its identity, content, reputation, and operating behavior. Normal interaction, including account login and standard transactions, is appropriate.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure of the hosting environment. Observed addresses were CDN edge servers—104.18.9.192 and 104.18.8.192—and the origin address was not observable in the analysis.

Closing Assessment

Standard browsing, account use, and ordinary ecommerce transactions are appropriate, subject to normal payment, delivery, and consumer-protection checks.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ubuy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
