

Is uca.edu.ar legit? TrustSniffer's high-trust assessment: 100/100

uca.edu.ar

Verdict

100

OUT OF 100

HIGH TRUST

uca.edu.ar appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking university site (Universidad Católica Argentina) providing institutional information, faculties, admissions, news, events, research outputs, campus addresses and contact details. Content and navigation oriented to students, applicants, staff and donors.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

UCA - Universidad Católica Argentina is an institutional university website presenting information about the university, faculties, academic programs, admissions, campuses, research, events, scholarships, fundraising, and student services for prospective and current members of its academic community.

Scam/Impersonation Risk

No contradictions were observed. The site's institutional content is coherent with a university model and includes structured information about faculties, admissions, research, campuses, authorities, and contact channels; the captured pages showed no login form, hidden sensitive form, credential-harvesting mechanism, wallet activity, or financial-fraud feature. One external classifier produced a single unconfirmed suspicious result, but there were no malicious detections, phishing indicators, or confirmed impersonation findings. An automated similarity signal also associated the presentation with an unrelated government-domain pattern; this is not treated as an identity contradiction because the page content consistently identifies Universidad Católica Argentina and no conflicting legal identity appears. A contact-channel integrity anomaly is present in the supplied page findings: the published address is `info@uca.edu.ar.com`, which is a deliverability-breaking domain construction or possible typosquat and should not be treated as proof of fraud.

EVIDENCE

- The homepage identifies "UCA - Universidad Católica Argentina" and provides university-specific navigation for institutional affairs, faculties, admissions, research, campuses, scholarships, and fundraising.
- The site's transport and domain history show registration in 1997 (~29.37 years old), with 5,000 archive snapshots spanning 1997–2025 (29 years tracked).
- External reputation checks recorded 0 malicious detections, 1 suspicious classification, 0 abuse reports, and no confirmed phishing or blacklist finding.
- Behavioral testing completed 2 successful runs and recorded 0 hidden forms, 0 password forms submitted externally, 0 wallet-provider detections, and 0 wallet-drainer runs.

Regulatory Verification Notes

The available evidence is consistent with an established academic institution, but the real-world operator identity is not independently verified. The site provides substantial institutional and academic information, including authorities, faculties, campuses, programs, research institutes, and admissions services. No licensing claim or

license number is presented in the supplied content; for an education website this is a regulatory-transparency point requiring contextual verification rather than evidence of scam activity. The site should therefore be regarded as apparently legitimate and evidence-consistent, not as independently proven in its legal or operating identity.

EVIDENCE

- Institutional and identity navigation includes “Nuestra Universidad,” authorities, faculties, institutes, campuses in Buenos Aires, Mendoza, Paraná, and Rosario, and admissions services.
- The site is served from AS14618 through AMAZON-AES - Amazon.com, Inc., US.
- The TLS certificate is issued by YE1, uses Domain Validation (DV), and is valid to 2026-10-07.
- The available broker-reputation dataset contains no matching broker record.

What to Verify Next

Before credential or payment interactions, independently confirm the institution’s official contact channels and admissions or matriculation details through a separately sourced university directory or offline contact route. Where tuition, fees, donations, or other payments are involved, confirm the beneficiary identity, applicable refund or cancellation terms, and payment-protection options; where relevant, confirm the institution’s status with the appropriate Argentine education authority.

EVIDENCE

- The admissions area includes “Preinscripción online,” “Matriculación Online,” “Aranceles,” and “Becas y Préstamos,” making independent confirmation of payment and enrollment procedures appropriate.
- The institutional content provides university authorities, campus locations, and contact information that can be cross-checked through an independent source.
- The supplied analysis found no sensitive forms or untrusted form destinations, so verification should focus on the authenticity of any later transaction or credential workflow rather than on the captured homepage.

Summary Verdict

Available evidence supports an established, apparently legitimate, low-risk institutional website. The overall trust posture is high, with substantial historical continuity, coherent academic content, and no observed scam or impersonation contradiction. Independent operator identity remains unverified, so legitimacy is evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure. The observed address belongs to an AWS edge endpoint, and no origin server address was observable in the analysis; this reduces direct origin exposure and is a mitigating infrastructure characteristic, not proof of institutional legitimacy.

Closing Assessment

Ordinary informational use is proportionate to the assessed posture; credential or payment activity should follow independent confirmation of the relevant transaction, contact, and institutional details.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of uca.edu.ar.

- The request stayed on uca.edu.ar. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 1997-03-29. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uca.edu.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
