

Is ucv.edu.pe legit? TrustSniffer's high-trust assessment: 100/100

ucv.edu.pe

Verdict

100

OUT OF 100

HIGH TRUST

ucv.edu.pe appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking university site (Universidad César Vallejo) in Spanish with program listings, admissions info, accreditations, campus locations, contact phone/WhatsApp and social links. Content focuses on academic offerings and institutional achievements.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the institutional web presence of Universidad César Vallejo, presenting undergraduate and postgraduate programmes, admissions information, campus locations, research and innovation activities, accreditations, student services, and institutional news for prospective students and other university stakeholders.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a university's ordinary operating model, including academic programme information, admissions content, campus references, institutional achievements, contact channels, and links to established social platforms. Technical interaction testing found no login form, hidden sensitive form, wallet activity, phishing indicator, or suspected brand impersonation. External reputation checks recorded no malicious or suspicious detections, while the site has an established global traffic footprint. The identity appears legitimate and evidence-consistent, although the real-world operator is not independently verified.

EVIDENCE

- The homepage identifies Universidad César Vallejo and presents academic programmes, admissions, campus, research, employability, and institutional-news content.
- Domain registration continuity indicates registration in 1998 and an age of approximately 27.67 years.
- Web-archive records contain 5,000 snapshots from 1998-12-12 through 2025-12-01, spanning 28 tracked years.
- Page and interaction analysis found no sensitive form, external password form, wallet connection, cloaking, or brand-impersonation indicator.

Regulatory Verification Notes

The site presents itself as an academic institution and publishes references to accreditations, rankings, partnerships, campus locations, and admissions. The available content does not provide a clearly identified licensing or registration number for independent confirmation, so regulatory status should be treated as a verification matter rather than as evidence of wrongdoing. The registration record names NIC.PE as registrar and Universidad Privada Cesar Vallejo as the registrant; these signals support the apparent institutional identity but do not independently prove the operator's legal status. A third-party broker-reputation dataset returned no

match, which is contextual support only and not a licensing determination. The site uses a valid domain-validated TLS certificate issued by Sectigo Public Server Authentication CA DV R36, expiring on 2026-12-15.

EVIDENCE

- The homepage and institutional content identify the organisation as Universidad César Vallejo and display accreditation, ranking, and partnership claims.
- Registration records list NIC.PE as registrar and “universidad privada cesar vallejo” as the registrant.
- The site’s transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-12-15.
- The academic pages provide programme and admissions information but do not show a clearly stated licensing or registration number in the supplied content.

What to Verify Next

Before credential or payment interactions, an institution considering engagement should confirm Universidad César Vallejo’s legal status and any applicable higher-education authorisation through the relevant Peruvian education registry. Admissions staff should also be reached through contact details independently obtained from an official institutional source, and any tuition, withdrawal, refund, or payment-protection terms should be reviewed before funds are transferred.

EVIDENCE

- The admissions and programme pages establish that the site supports student-enrolment activity.
- The contact presentation includes telephone, WhatsApp, and social-channel references that can be cross-checked independently.
- The supplied content contains accreditation and ranking claims that are suitable for confirmation with the named institutions or registries.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate university website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, blacklist, or identity-conflict indicators were observed, while operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves to infrastructure operated by HWCLOUDS-AS-AP—Huawei Clouds, HK, with a direct hosting posture rather than a detected CDN or WAF edge. This is a neutral infrastructure characteristic; the resolved hosting environment and stable TLS implementation provide technical context but do not independently establish legitimacy.

EVIDENCE

- Hosted on AS136907, HWCLOUDS-AS-AP - HUAWEI CLOUDS, HK, with the resolved service located in Singapore.
- Infrastructure resolution identified one IP address and no detected CDN edge provider.
- The resolved service returned stable web content during technical testing.

Closing Assessment

Ordinary browsing and routine institutional engagement are proportionate to the assessed posture; independent confirmation of institutional identity, applicable authorisation, payment protections, and transaction terms should precede credential submission or payment.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Identity verified on page
- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ucv.edu.pe.

- The request stayed on ucv.edu.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by net.pe, across 2 name servers. NOTED
- The earliest public archive of this site is from 1998-12-12. CLEAR
- It is hosted on HWCLOUDS-AS-AP, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ucv.edu.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
