

Is uit.ac.ma legit? TrustSniffer's high-trust assessment: 90/100

uit.ac.ma

Verdict

90

OUT OF 100

HIGH TRUST

uit.ac.ma appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Official university website for Université Ibn Tofaïl de Kénitra: provides contact details, faculties, centres, admissions and news/events. Content in French/Arabic with academic and administrative information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the institutional portal of Université Ibn Tofaïl de Kénitra, presenting university leadership, faculties, academic programs, admissions, research activities, student services, events, and contact information in French and Arabic. Its apparent purpose is public-sector academic information delivery and administrative service provision rather than direct commercial activity.

Scam/Impersonation Risk

No phishing, malware, blacklist, or confirmed impersonation contradictions were observed. The homepage consistently identifies Université Ibn Tofaïl and provides institution-specific academic and administrative content, while the absence of login forms, hidden forms, wallet functionality, and sensitive external submissions is consistent with a low-abuse informational site. A domain-similarity signal involving a short unrelated name did not establish brand impersonation and is outweighed by the university-specific content and coherent institutional presentation.

EVIDENCE

- The homepage identifies “Université Ibn Tofaïl de Kénitra” and lists faculties, research centres, admissions, recruitment, governance, and student services.
- Page behavior recorded no login form, hidden form, password submission, wallet connection, wallet-drainer activity, or clipboard hijacking.
- The domain history contains 826 archive snapshots spanning 2012–2026, with 15 years tracked and a maximum observed gap of 1 year.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit.

Regulatory Verification Notes

The site presents a clear academic identity through its institutional pages, including university leadership, council structures, faculties, centres, and contact information. Available evidence is consistent with an established, apparently legitimate university website, but the real-world operator identity is not independently verified by this assessment. A regulatory or licensing status is not established, and the site does not present a license number or regulated-financial-service claim; this is a limited disclosure point relevant to administrative verification rather than evidence of fraud. The domain is registered through ITISSALAT AL-MAGHRIB, with the

registration record naming UNIVERSITE IBN TOFAIL as the owner. The transport layer uses a valid domain-validated certificate issued by YR2.

EVIDENCE

- The institutional presentation pages identify university leadership, faculties, centres, and administrative structures, while the site's business model is informational and publicly funded rather than payment-led.
- The domain was registered on 2015-12-02 and is approximately 10.7 years old; the registrar is ITISSALAT AL-MAGHRIB.
- Hosting resolves to AS24940, HETZNER-AS - Hetzner Online GmbH, DE.
- The TLS certificate is DV, issued by YR2, and valid to 2026-09-17.

What to Verify Next

Before credential or payment interactions associated with admissions or other administrative services, an institution or enterprise should independently confirm the relevant university contact route and ensure that any payment request corresponds to an official admissions or fee process. Where a transaction involves an external service, the applicable merchant identity, refund terms, and payment-protection arrangements should be checked separately from the website's own claims.

EVIDENCE

- Admissions and pre-registration content provides the operational context for any future application or fee-related interaction.
- The contact and institutional-information pages provide the channels that can be cross-checked through an independent route.
- The site's stated functions cover academic information, research, events, recruitment, and administration rather than a general commercial marketplace.

Summary Verdict

The overall posture is high trust and low risk, with strong convergence between the site's institutional purpose, sustained historical continuity, clean external reputation, and stable technical presentation. Legitimacy is apparent and evidence-consistent, although operator identity remains independently unverified.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, and the observed address was an edge address rather than an exposed origin candidate. This reduces direct infrastructure exposure and is a positive mitigating control, but protective network infrastructure is not, by itself, proof of institutional ownership.

EVIDENCE

- The observed edge address was 157.90.94.241; no likely origin address was identified in the infrastructure analysis.

Closing Assessment

Routine informational use is proportionate to the assessed posture; independent confirmation of official channels, applicable terms, and payment protections should precede any credential or payment interaction.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of uit.ac.ma.

- The request stayed on uit.ac.ma. It was not redirected to another domain. CLEAR
- Registration is published under ITISSALAT AL-MAGHRIB. CLEAR
- DNS for this domain is served by ac.ma, across 2 name servers. NOTED
- The registration is paid up to 2026-12-02. NOTED
- The earliest public archive of this site is from 2012-08-05. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uit.ac.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
