

Is ukdevilz.com legit? TrustSniffer's high-trust assessment: 90/100

ukdevilz.com

Verdict

90

OUT OF 100

HIGH TRUST

ukdevilz.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

A multilingual adult video listing/aggregation site with many explicit titles (including incest/underage implications in metadata). Likely hosts or links to pirated content; lacks clear ownership, licensing or contact information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://ukdevilz.com/home

What ukdevilz.com served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Ukdevilz.com presents a multilingual adult-video listing and aggregation service, displaying explicit video titles, popularity rankings, filters, and playback-oriented content; its apparent business model is traffic- and advertising-driven aggregation, potentially including links to or indexing of pirated material.

Scam/Impersonation Risk

A confirmed blacklist entry is the principal contradiction and warrants a clearly cautionary posture for sensitive interaction. No distinct legal-entity identity contradiction or brand-impersonation pattern was observed, but the homepage contains explicit titles with incest and underage implications, while the observed browser behavior included possible autoplay media, potential malware exposure, substantial external activity, and non-whitelisted posts. The combination of the confirmed blacklist signal and the site's questionable content environment materially outweighs its ordinary technical indicators of operational continuity.

EVIDENCE

- The homepage displays explicit multilingual titles, including entries containing incest-related and underage implications.
- External reputation data records the domain as blacklisted, with additional malicious and suspicious determinations.
- The browser session recorded 10 external XHR requests, 9 external posts, 5 non-whitelisted posts, and a maximum external-activity proportion of 72.4%.
- The domain was registered on 2017-10-16 and is 8.84 years old.

Regulatory Verification Notes

The site does not present a clear legal identity, content-licensing basis, or transparent value-flow explanation. Its apparent advertising and traffic model, together with the absence of a stated license or licensing authority, leaves the legal status of the indexed material unresolved; this is a disclosure and verification gap rather than, by itself, proof of fraud. A valid transport certificate and identifiable hosting infrastructure support technical continuity, but do not establish operator identity, lawful content rights, or regulatory standing.

EVIDENCE

- The homepage identifies the service primarily through the name “Ukdevilz” and video listings, without a clear corporate or legal-entity disclosure.
- The page content describes an adult-video aggregation model with no stated licensing authority or license number.
- The site is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS uses issuer WE1 with DV validation and is valid to 2026-11-14T21:27:15+00:00.

What to Verify Next

Before any sensitive interaction, an independent review should establish the responsible operator and confirm that the relevant content is lawfully licensed and accessible in the intended jurisdiction. Official contact channels should be confirmed through an independent route rather than relying solely on information presented on the site. Any browser testing should be conducted in an isolated environment with autoplay and unsolicited downloads restricted.

EVIDENCE

- The homepage contains no login form, password field, or other sensitive form in the observed capture.
- The observed browser session completed 2 successful runs and recorded 6 console errors.
- The site presents no clear product, transaction, or payment workflow from which the responsible commercial entity can be independently identified.

Summary Verdict

The overall posture is elevated for sensitive interaction and is not appropriate for treating the site as a dependable destination for credentials, financial activity, or other high-consequence actions. Although the web

presence shows signs of technical continuity and substantial public reach, the confirmed external contradiction and the site's content and disclosure characteristics require a security-forward assessment.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed addresses are CDN edge infrastructure rather than identified origin candidates. This provides a meaningful layer of exposure mitigation, but protective hosting infrastructure is not evidence that the operator or the site's content is legitimate.

Closing Assessment

Prospective users should limit interaction to carefully controlled, non-sensitive inspection until operator identity, content rights, and the purpose of any external browser activity have been independently established.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- The page exchanged network traffic with destinations TrustSniffer does not recognise.

Analysis engine signal:direct_threat

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ukdevilz.com.

- The request stayed on ukdevilz.com. It was not redirected to another domain. CLEAR
- Registration is published under Danesco Trading Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-16. NOTED
- It is hosted on CLOUDFLARENET, from a server in CZ. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ukdevilz.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
