

Is umsu.ac.id legit? TrustSniffer's high-trust assessment: 100/100

umsu.ac.id

Verdict

100

OUT OF 100

HIGH TRUST

umsu.ac.id appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 45%.

What this site appears to be

Official-looking university website (Universitas Muhammadiyah Sumatera Utara) with multilingual translation UI, program listings, organizational units, news, and campus contact information. No evident login/payment prompts or investment claims.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website presents Universitas Muhammadiyah Sumatera Utara (UMSU) as an institutional university serving the Medan, North Sumatra, area, with academic-program information, campus units, student services, admissions-related content, news, multilingual presentation, and campus contact details. Its apparent business model is educational and institutional rather than investment, trading, or direct online financial services.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity indicators were observed. The homepage presents a coherent university profile with programs, organizational units, news, and contact information, and does not expose evident login, payment, investment, or cryptocurrency prompts. Behavioral testing did identify hidden forms, but no password-bearing external forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts were detected; this isolated technical artifact does not contradict the site's low-risk informational presentation. The available evidence is therefore consistent with an established, apparently legitimate university website, although the operator's real-world identity is not independently verified.

EVIDENCE

- The homepage identifies UMSU and provides university topics including academic programs, campus units, services, news, and contact information.
- The homepage contains no detected login form, sensitive form, investment claim, cryptocurrency signal, or untrusted form destination.
- Behavioral testing recorded hidden forms, while password external forms, wallet-drainer runs, clipboard writes, suspicious scripts, and cloaking were all absent.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist finding.

Regulatory Verification Notes

The site's content is consistent with an academic institution and includes institutional, program, organizational, and contact information. It does not present a licensing or registration number in the supplied pages; for a university website, that is a transparency item for institutional-status verification rather than evidence of a scam. The displayed identity should remain treated as an on-page institutional claim rather than independently proven. Technical and reputational signals nevertheless support an established-site assessment: the domain has been

registered for many years, the transport certificate uses organization validation from DigiCert, and the hosting network is identified.

EVIDENCE

- Domain registration: 1997-11-07, approximately 28.78 years old; registrar listed as PT Core Mediatech.
- Hosted on AS7713, PT Telekomunikasi Indonesia, ID.
- TLS certificate uses OV validation, issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1, valid to 2026-09-07.
- The homepage title identifies “UMSU - Kampus Terbaik di Medan Sumut - Akreditasi Unggul,” while the page content provides institutional programs and campus information.

What to Verify Next

Before credential or payment interactions associated with admissions or campus services, independently reconcile the UMSU identity and contact details through an academic directory or an offline institutional contact route. Any tuition, application, or service payment should be checked against the university's published payment instructions and completed using payment methods that provide appropriate transaction protection. Institutional accreditation or registration status should also be confirmed through the relevant education authority if that status is material to the intended engagement.

EVIDENCE

- The homepage provides the institutional name, academic offerings, campus services, and contact information needed for independent comparison.
- Program and organizational-unit pages provide additional identity context for checking that an admissions or service interaction is consistent with the institution.
- The site's apparent purpose is informational education delivery rather than direct online financial-product activity.

Summary Verdict

The website has a **high-trust, low-risk posture** and its content, long-running domain presence, clean external reputation, and validated transport security are consistent with an established site. The evidence supports normal informational use, while the operator's real-world identity remains an independently unverified aspect of the assessment.

Infrastructure Integrity

The supplied infrastructure evidence identifies stable hosting on PT Telekomunikasi Indonesia and a valid organization-validated DigiCert certificate. No specific CDN or WAF mitigation is established in the supplied evidence, so protective infrastructure should be regarded as a technical control consideration rather than proof of institutional identity.

Closing Assessment

Ordinary browsing is proportionate to the observed risk posture; admissions, credential, and payment interactions should proceed after the routine independent identity, transaction, and payment-protection checks described above.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of umsu.ac.id.

- The request stayed on umsu.ac.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Core Mediatech. CLEAR
- DNS for this domain is served by ac.id, across 2 name servers. NOTED
- The registration is paid up to 2026-10-31. NOTED
- It is hosted on telkomnet-as-ap, from a server in ID. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about umsu.ac.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
