Full analysis

Overview

UniCesumar's website is an institutional higher-education portal presenting in-person, distance-learning, and blended programmes, together with admissions pathways, student services, campus information, and institutional contacts; its apparent business model is the provision of degree, postgraduate, technical, and professional education funded primarily through tuition and related services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent university-focused service model under the UniCesumar name, with course categories, campus locations, admissions information, student and staff areas, and institutional navigation rather than an anomalous financial or promotional scheme. The available page analysis found no phishing, brand-impersonation, credential-harvesting, suspicious form, or malicious-reputation indicators. The domain's long operating history and sustained archival presence further support continuity with the presented institutional purpose. The apparent legitimacy is strong, but the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies the site as UniCesumar and presents graduação, pós-graduação, técnico, profissionalizante, presencial, EAD, and semipresencial education options.
- The homepage analysis detected no login form, hidden sensitive form, password-external form, wallet interaction, or untrusted destination.
- The domain was registered in 2013 and is approximately 13.35 years old; archival records contain 527 snapshots spanning 2013-09-24 to 2026-07-09 across 14 years tracked.

Regulatory Verification Notes

The institutional and identity content is consistent with a university website, including “Conheça a Unicesumar,” campus and unit information, an ethics channel, employment information, and contact details. A registration record associates the domain with CESUMAR - CENTRO UNIVERSITARIO DE MARINGA, but the operator identity is not independently verified by the available evidence and should therefore be treated as apparent rather than proven. No licence, registration number, or independent regulatory confirmation is supplied in the analysed material; this is a regulatory-disclosure point requiring ordinary verification, not an indication of impersonation. No matching third-party broker-reputation record was identified.

EVIDENCE

- The registration record lists “CESUMAR - CENTRO UNIVERSITARIO DE MARINGA” as the associated organisation.
- Network telemetry identifies AS13335, CLOUDFLARENET - Cloudflare, Inc., US; infrastructure records also identify AS264454, Sociedade Educacional Leonardo da Vinci S/S Ltda, BR.
- The site's TLS certificate uses issuer YE2, validation level DV, and is valid to 2026-10-25.

What to Verify Next

Before credential or payment interactions, independently confirm the institution’s legal identity and any applicable education authorisation or accreditation through the relevant official registry. Tuition, cancellation, withdrawal, and refund terms should be reviewed on the applicable institutional pages, and payment-protection arrangements should be confirmed before committing funds. Contact channels should be validated through an independently sourced institutional directory or offline route, particularly where account or admissions access is involved.

EVIDENCE

- The homepage provides institutional contact numbers and lists units including Maringá, Curitiba, Londrina, Ponta Grossa, Corumbá, and Campo Grande.
- The admissions content identifies ENEM, vestibular, and transfer pathways.
- The student-services navigation references student and professor areas and the Studeo App.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate education website. No scam, phishing, impersonation, or other contradicting risk signal was identified, while independent confirmation of the real-world operator remains the principal qualification.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and provides a meaningful mitigation against direct exposure and abusive traffic patterns. The observed infrastructure includes Cloudflare edge addresses and potential origin candidates, so the protective layer should be regarded as a security control rather than proof of institutional legitimacy.

Closing Assessment

Normal browsing and routine educational research are proportionate, while independent identity, terms, and payment-protection checks should be completed before submitting credentials or making tuition-related payments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about unicesumar.edu.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
