Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is the institutional website of Universidad del Magdalena in Colombia, presenting university information, academic programs, admissions resources, research and extension activities, news, events, public services, and contact details for applicants, students, staff, and other stakeholders. Its apparent business model is public university administration and educational information rather than direct commercial activity.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there are no detected phishing, impersonation, malicious-content, or brand-misuse indicators. The site's content is consistent with a university presence, including institutional history, mission and vision, academic faculties, public accountability material, admissions information, and a public phone book. One external reputation assessment produced an isolated suspicious classification, but it was not accompanied by a malicious detection, a phishing determination, or reported abuse, so it remains a limited and unconfirmed reputational signal rather than evidence of impersonation. The available evidence therefore supports an apparently legitimate, low-risk institutional website, while independent operator identity remains unverified.

EVIDENCE

- Registration record: domain created on 2005-01-20 and recorded as 21.58 years old.
- Homepage: identifies Universidad del Magdalena and presents institutional, academic, admissions, news, events, and public-service content without identified red flags.
- External reputation checks: 0 malicious detections, 1 suspicious classification, 0 abuse reports, and no phishing-site determination; traffic rank recorded as 59588 and within the top 1 million.

Regulatory Verification Notes

The legal and institutional content presents the site as a departmental public university headquartered in Santa Marta, Colombia, with sections for organizational structure, accountability, management reports, transparency, and public contact services. This is evidence-consistent with an established academic institution, but it does not independently prove that the website operator is the real-world entity represented. No financial-services license or registration number is presented in the reviewed institutional content; because the site describes public university services rather than a regulated financial offering, this is a disclosure point for institutional verification, not evidence of a scam. The site's technical and operational signals materially support its established appearance.

EVIDENCE

- Hosting infrastructure: served from AS267893, identified as AS267893 - UNIVERSIDAD DEL MAGDALENA, CO.
- Transport encryption: Sectigo Public Server Authentication CA OV R36 issued an OV certificate for Universidad del Magdalena, valid through 2027-02-18.
- Registration record: registrar identified as Registro Colombia, with expiration recorded as 2030-01-24.
- Homepage navigation: includes History, Mission and Vision, Organizational Structure, Accountability, Management Reports, Academic Faculties, and Phone Book sections.

What to Verify Next

Before credential or payment interactions, independently confirm the university's institutional status through the relevant Colombian higher-education authority and obtain contact details through an independently sourced channel rather than relying solely on the website. For admissions, tuition, or other financial activity, confirm the recipient, payment instructions, refund terms, and available payment protections through the university's official administrative channels. Any account interaction should use the institution's independently confirmed service route.

EVIDENCE

- The homepage provides applicant, student, teacher, graduate, and worker access paths that can be cross-checked against independently sourced institutional information.
- Admissions and academic-program sections are present and should be matched to official university enrollment information.
- The site exposes public contact and phone-book functions that can be compared with independently obtained institutional contact details.

Summary Verdict

The overall posture is high trust and the evidence is consistent with an established, apparently legitimate university website. The classification supports ordinary informational use, but the real-world operator identity is not independently verified, so the site should not be treated as identity-proven solely on the basis of its presentation.

Infrastructure Integrity

The domain resolves directly to a university-associated Colombian hosting network, with one likely origin address and no detected CDN or WAF layer. Direct institutional hosting provides a coherent infrastructure relationship and straightforward attribution, although hosting alignment is a mitigating signal rather than proof of legitimacy.

Closing Assessment

Routine informational use is proportionate; credentials, admissions submissions, and payments should follow ordinary independent identity, contact-channel, refund, and payment-protection checks before proceeding.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of unimagdalena.edu.co.

- The request stayed on unimagdalena.edu.co. It was not redirected to another domain. CLEAR
- Registration is published under www.registrocolombia.co. CLEAR
- DNS for this domain is served by edu.co, across 2 name servers. NOTED
- The registration is paid up to 2030-01-24. CLEAR
- It is hosted on AS267893, from a server in CO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about unimagdalena.edu.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
