

Is uniovi.es legit? TrustSniffer's high-trust assessment: 90/100

uniovi.es

Verdict

90

OUT OF 100

HIGH TRUST

uniovi.es appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

Official Universidad de Oviedo site with extensive informational content about academics, research, campus services and news. Cookie consent is present. No financial solicitation or credential-harvesting indicators detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as the official Universidad de Oviedo institutional portal, offering information on degree programmes, postgraduate study, research, admissions, student and campus services, administrative resources, news, and events. Its apparent purpose is public university communication and service delivery rather than direct online financial transactions.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there are no detected phishing or brand-impersonation indicators, no malicious or suspicious reputation findings, and no financial solicitation or credential-harvesting behaviour on the reviewed pages. The homepage contains substantial university-specific content, including academic programmes, research services, campus resources, multilingual navigation, and institutional social-media links. The site's long, continuous historical presence and established public profile are consistent with an apparently legitimate university website, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Universidad de Oviedo and presents degree, master's, doctoral, research, student-service, campus, and administrative content; no sensitive login form or untrusted form destination was detected.
- Domain history shows registration in 1997 and an age of approximately 29.58 years.
- The web archive records 5,000 snapshots from 1997-01-12 through 2023-08-11, covering 27 tracked years.

Regulatory Verification Notes

The site operates as an educational and institutional information service, not as a financial or other clearly regulated commercial platform. Its pages include cookie and privacy information and provide access points such as the Intranet and electronic administrative office; however, the available evidence does not independently verify the legal operator beyond the site's institutional presentation. No financial-services licence is claimed or required by the apparent business model, but institutional identity and any formal administrative disclosures should be confirmed through authoritative university or public-sector records before a consequential transaction or credential exchange. External reputation evidence is clean, with no matched broker-related warning.

EVIDENCE

- The homepage's stated business model is public university information and services funded through public funding, tuition, and institutional operations rather than direct online monetary exchange.
- Hosting is identified as AS766, RedIRIS - Entidad Publica Empresarial Red.es, ES.
- The site uses an OV TLS certificate issued by GEANT TLS RSA 1 for Universidad de Oviedo, valid through 2026-12-01.

What to Verify Next

For higher-impact interactions, confirm that the relevant page is reached through the university's independently published institutional directory or another official public-sector channel, and confirm the responsible university office using contact details obtained through that separate route. Before supplying credentials or making any payment connected with an administrative service, review the applicable privacy, fee, refund, and payment-protection terms and ensure that the transaction is processed through the university's recognised service pathway.

EVIDENCE

- The homepage provides distinct navigation to the Intranet and electronic administrative office, allowing the relevant service route to be checked against an independent institutional directory.
- The site offers Spanish, Asturian, and English navigation and includes a cookie-policy mechanism, providing identifiable institutional touchpoints for cross-checking.
- The reviewed pages contain no direct monetary-exchange workflow or sensitive form, so any later payment or credential request should be assessed as a separate service interaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk university website. The high-trust posture is supported by convergence between the site's substantive institutional content, sustained historical continuity, clean external reputation, and coherent technical identity signals, while operator identity should remain described as likely rather than proven.

Infrastructure Integrity

The site resolves directly to a single identified origin rather than through a detected CDN or WAF edge network; this limits the protective benefit of intermediary infrastructure but does not, in this case, create a contradiction with the broader trust assessment.

Closing Assessment

Normal informational use is proportionate, while credential or payment interactions should proceed only after the ordinary independent institutional, service-terms, and payment-protection checks have been completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of uniovi.es.

- The request stayed on uniovi.es. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 1997-01-12. CLEAR
- It is hosted on RedIRIS, from a server in ES. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about uniovi.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
