Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the institutional portal of Università Ca’ Foscari Venezia, presenting university news, research, teaching and course information, student and administrative services, events, campus information, and institutional resources for an apparent public-university audience.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent university identity, publishes institutional notices, contact information, privacy and cookie materials, and shows no phishing, malicious-content, or confirmed impersonation indicators. Dynamic testing did record hidden forms, substantial page changes after interaction, external posts, and synthetic responses; however, the captured homepage contained no login form, no sensitive form, and no untrusted form destination, so these behaviors do not establish a scam mechanism. An automated similarity signal associated the presentation with another prominent organization, but the page itself consistently identifies Università Ca’ Foscari Venezia and the available evidence does not support brand impersonation.

EVIDENCE

- The homepage identifies “Università Ca’ Foscari Venezia” and provides university-specific research, teaching, service, event, and campus content.
- The domain was registered on 1996-01-29 and is approximately 30.56 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no external blacklist hit for the evaluated domain.

Regulatory Verification Notes

The site appears to operate as a public university portal rather than as a financial, investment, or other regulated commercial service. Its pages include institutional notices, privacy and cookie policies, contact details, and administrative information; no financial licence or regulated-service registration number is presented, which is consistent with the stated university model but should not be treated as proof of any particular legal status. The real-world operator identity is likely and evidence-consistent, but it has not been independently verified. No associated broker warning was identified in the available third-party context.

EVIDENCE

- The page content classifies the site as a university and describes research, teaching, services, events, and institutional resources.
- The site's hosting is identified as AS137, ASGARR – Consortium GARR, IT.
- The transport certificate is DV-validated, issued by GEANT TLS RSA 1, and valid through 2026-11-20.

What to Verify Next

Before credential or payment interactions, independently confirm the institution and the relevant service through a university directory, an independently obtained institutional contact route, or an offline channel. Review the applicable privacy, terms, refund or payment provisions for the specific transaction, and ensure that any payment is processed through an expected institutional payment path rather than an unsolicited alternative channel.

EVIDENCE

- The site provides institutional contact details and administrative information that can support independent confirmation.
- The site publishes privacy and cookie policies for review before account or service interaction.
- The portal exposes no sensitive form or untrusted form destination in the captured homepage.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate institutional website and supports a high-trust, low-risk posture. No scam, phishing, blacklist, or identity-contradiction indicators were identified, although the operator's real-world identity remains not independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure associated with ASGARR – Consortium GARR, IT, with no CDN or WAF identified and two likely origin addresses. A DNS heuristic marked the configuration as "fast-flux-like," but this is an unconfirmed heuristic and is not treated as a substantive adverse finding; hosting infrastructure should remain a mitigating or contextual signal rather than proof of legitimacy.

Closing Assessment

Normal informational use is proportionate; for credentials or payments, ordinary independent confirmation of institutional identity, applicable transaction terms, and payment protections should be completed first.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100

Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of unive.it.

- The request stayed on unive.it. It was not redirected to another domain. CLEAR
- Registration is published under Consortium GARR. CLEAR
- DNS for this domain is served by garr.net. NOTED
- The registration is paid up to 2027-01-29. NOTED
- It is hosted on ASGARR, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about unive.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
