

Is unne.edu.ar safe? TrustSniffer's moderate-trust assessment: 65/100

unne.edu.ar

Verdict

65

OUT OF 100

MODERATE TRUST

unne.edu.ar is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 45%.

What this site appears to be

Official site of Universidad Nacional del Nordeste (UNNE) offering navigation to institutional information, study programs, student services, research, news and contact details. Content is informational and administrative.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the institutional portal of Universidad Nacional del Nordeste (UNNE), presenting academic programs, admissions information, student services, research, institutional governance, news, administrative procedures, and contact resources for an academic and public-service audience rather than a direct commercial or financial-services market.

Scam/Impersonation Risk

No contradictions were observed. The homepage and institutional sections consistently identify the organization as Universidad Nacional del Nordeste and provide coherent university-focused content, including faculties, degree programs, research, governance, staff procedures, and transparency resources. A name-similarity signal involving “un.org” was not corroborated by phishing behavior, impersonation indicators, conflicting institutional identities, suspicious forms, or malicious external reputation findings; it is therefore treated as an unconfirmed similarity artifact rather than evidence of impersonation. The site’s apparent purpose and operating model are informational and administrative, with no observed cryptocurrency, investment, payment-capture, or other abuse-oriented features.

EVIDENCE

- The homepage title and visible navigation identify “UNNE – Universidad Nacional del Nordeste” and link to institutional, academic, research, news, and administrative areas.
- Institutional pages present “Historia,” “Organización y Autoridades,” “Rectorado,” “Unidades Académicas,” “Presupuesto e Información Universitaria,” and “Portal de Transparencia.”
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, with no confirmed phishing or blacklist result.
- The homepage contained no login form, hidden form, sensitive data form, wallet interaction, or external password-submission destination.

Regulatory Verification Notes

The available evidence is consistent with an academic institution whose site provides public university information and administrative services, not a regulated financial or brokerage offering. The identity appears likely from the site’s institutional presentation and linked social presence, but independent real-world operator verification is not established by the supplied evidence. No financial license claim or license number is presented because the observed business model does not appear to involve regulated financial products; any activity extending beyond ordinary academic or administrative use would require separate authorization checks.

The absence of a broker-related third-party match is contextual only and is not a legal or regulatory determination.

EVIDENCE

- The site's business-model content describes a public university information portal supported by public funding and institutional services rather than direct commercial transactions.
- The site provides dedicated pages for institutional governance, internal audit, quality management, budget information, procurement, and transparency.
- The hosting infrastructure is identified as AS7303, Telecom Argentina S.A., AR.
- The site uses an OV TLS certificate issued by Sectigo Public Server Authentication CA OV R36, valid through 2027-04-09.

What to Verify Next

Before any sensitive or high-value interaction, an organization should independently confirm that the relevant academic department, admissions office, or administrative unit is the intended counterparty using contact details obtained through an established institutional directory or an offline channel. Any request for payment, identity documents, or credentials should be checked against the university's published procedure and independently confirmed before completion. If a proposed service involves financial activity outside the site's apparent academic purpose, the responsible entity and any applicable authorization should be verified with the relevant authority.

EVIDENCE

- The homepage exposes dedicated "Información de Contacto" and "Trámites" navigation for administrative engagement.
- Academic pathways include degree admissions, postgraduate programs, scholarships, diploma procedures, and document legalisation services.
- The site links to Facebook, Instagram, YouTube, Spotify, and WhatsApp social-presence channels.

Summary Verdict

The overall posture is **moderate trust**: the site presents a coherent institutional identity, a low-risk informational purpose, and no observed scam, phishing, or impersonation contradiction. Identity confidence remains qualified rather than conclusive, so the site is best regarded as an apparently legitimate university portal suitable for ordinary informational use, with additional confirmation appropriate for sensitive or high-value transactions.

Infrastructure Integrity

The supplied infrastructure evidence does not establish a CDN, WAF, or origin-masking posture. The identified hosting arrangement and valid organization-validated TLS provide useful technical context for transport and service attribution, but infrastructure characteristics alone do not prove the real-world identity of the operator.

Closing Assessment

Ordinary browsing and routine academic information gathering are proportionate uses; sensitive submissions, payments, or unusually high-value actions should proceed only after independent confirmation of the responsible institutional channel and transaction details.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%
- Identity verified on page - Trusted social count=3	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of unne.edu.ar.

- The request stayed on unne.edu.ar. It was not redirected to another domain. CLEAR
- It is hosted on AS7303, from a server in AR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about unne.edu.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
