Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

UnoTV is an established Spanish-language news and media website serving Mexican and international coverage across politics, business, health, technology, culture, sports, entertainment, lifestyle, and opinion, supported by display advertising, sponsored recommendations, and personalized-advertising partnerships.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other fraud signals were observed. The homepage behaved as a conventional content portal: it contained no login form, sensitive form, hidden form, wallet interaction, clipboard manipulation, cloaking, or redirect mismatch. Its long-established domain, extensive historical record, strong global traffic footprint, and clean external reputation converge with the current news-media presentation and support a legitimate identity.

- The domain record shows registration in 2003 (~23 years old), through NOM-IQ Ltd dba Com Laude, with AMX Contenido S.A de C.V identified as the registrant organization.
- The domain's historical record contains 5,000 archive snapshots spanning 2003–2020 (18 years tracked), with no confirmed suspicious repurposing or semantic conflict.
- The homepage presents substantial current-affairs content under the UnoTV identity and exposes no sensitive, hidden, or externally submitted forms.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no reported infrastructure abuse, and a global traffic rank of 8,264.

Regulatory Verification Notes

UnoTV presents as an advertising-supported publisher rather than a regulated financial service. Accordingly, the absence of a financial-services licence claim is not adverse. The homepage includes a Codere gambling promotion carrying permit references DGG/SP/442/97 and DGJS/234/2019, an adults-only notice, and responsible-gaming language; those representations relate to the advertiser and should not be construed as UnoTV's own regulatory status. The site also describes personalized data sharing with 204 advertising partners, including cross-site profiling, device linking, and precise-geolocation requests, making consent choices the principal digital-trust consideration.

- The homepage identifies the service as a news and media publication covering ten broad editorial subject areas, with named opinion contributors and no financial-product solicitation.
- The homepage labels the gambling promotion for adults aged 18 or over and displays responsible-gaming language alongside the stated permit references.

- The homepage consent interface describes data sharing with 204 advertising partners and presents controls for personalized advertising.
- The site is served from AS16509 (Amazon.com, Inc.); its DV TLS certificate was issued by Amazon RSA 2048 M01 and is valid to 2027-02-08.

What to Verify Next

Enterprise users should review the consent configuration before enabling optional advertising purposes, particularly precise location, cross-site profiling, and device linking. Organizations consuming editorial material for consequential decisions should independently corroborate individual articles and distinguish sponsored recommendations or advertisements from newsroom content. Any engagement with a promoted third party should be assessed separately from the trustworthiness of UnoTV itself.

- The consent interface provides the observable basis for reviewing and limiting optional advertising permissions.
- The homepage incorporates sponsored-content widgets and conventional advertisements alongside editorial material.
- The gambling promotion directs visitors to a separate external service, creating a distinct third-party relationship requiring its own assessment.

Summary Verdict

UnoTV is a legitimate, established, and trustworthy news website. Its identity, operating history, current content, traffic footprint, technical controls, and external reputation converge without contradictory fraud or impersonation signals. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site uses mainstream Amazon content-delivery infrastructure and valid encrypted transport. This shared edge-hosting posture reduces direct infrastructure exposure and supports availability, although protective delivery infrastructure is a mitigating security control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with UnoTV normally while applying ordinary privacy preferences and independently assessing any external advertiser or sponsored destination before transacting.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of unotv.com.

- The request stayed on unotv.com. It was not redirected to another domain. CLEAR
- Registration is published under NOM-IQ Ltd dba Com Laude. CLEAR
- DNS for this domain is served by awsdns-09.org, across 4 name servers. NOTED
- The registration is paid up to 2026-11-26. NOTED
- The earliest public archive of this site is from 2003-06-07. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about unotv.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
